(1) NOTE: The guidelines focus on the provision of public hospital services to eligible persons, but operate in an environment where eligible persons have the right to choose private health care in public and private hospitals supported by private health insurance.

(2) NOTE:

- (a) Hospital services include in-patient, out-patient, emergency services (including primary care where appropriate) and day patient services consistent with currently acceptable medical and health service standards.
- (b) At the time of admission to a hospital, or as soon as practicable after that, an eligible person will be required to elect or confirm whether he or she wishes to be treated as a public or private patient.

 - (i) whether or not an eligible person has health insurance;
 - (ii) an eligible person's financial status or place of residence;
 - (iii) whether or not an eligible person intends to elect, or elects, to be treated as a public or private patient.
- (b) This guideline applies equally to waiting times for elective surgery.

(4) NOTE:

- (a) This guideline does not require a local hospital to be equipped to provide eligible persons with every hospital service they may need.
- (b) In rural and remote areas, the Territory should ensure provision of reasonable public access to a basic range of hospital services which are in accord with clinical practices.

(5) NOTE:

- (a) The joint Commonwealth/Territory development of a Public Patients' Hospital Charter for the Territory will be a vehicle for the public dissemination of this information.
- (b) The Charter will set out the public hospital services available to public patients.
