# Utilities – Water Restriction Scheme Approval 2003 (No 2)

Disallowable instrument DI2003—54

made under the

**Utilities Act 2000, s 234 (Regulation making power); Utilities (Water Restrictions) Regulations 2002, reg 5 (Approved water restriction scheme)**

---

## 1. Revocation

I revoke the following instrument

- Water Restriction Scheme Approval 2003 (No 1), DI2003-29.

## 2. Approval of scheme

I approve the attached water restriction scheme.

Ted Quinlan  
Treasurer  
16 April 2003

## SCHEME OF RESTRICTIONS ON THE USE OF WATER FROM ACTEW CORPORATION WATER SUPPLY SYSTEM

This approved water restrictions scheme may be implemented by ACTEW Corporation Limited making declarations pursuant to Regulation 8 of the *Utilities (Water Restrictions) Regulations 2002* so that water restrictions specified for a stage in the table below are imposed either:

- (1) when remaining ACTEW water storages (combined Bendora, Corin, and Googong dams) reach or fall below the percentage level specified in the table for that stage, or;
- (2) when the quantity of water of potable quality available to ACTEW, on a sustainable basis, falls to or below the daily rate specified in the table for that stage.

ACTEW may impose Stage 1 restrictions at its discretion when water storage levels are between 57.5% and 52.5% of capacity, but must impose such restrictions if storage levels fall below 52.5%. In exercising this discretion, ACTEW may have regard to all relevant considerations including current and predicted storage levels, usage rates and weather conditions.

Where ACTEW imposes water restrictions pursuant to (2) above, ACTEW shall impose only that Stage of restrictions that it considers necessary to reduce daily consumption to or below the level of availability of potable water specified in the table below. In deciding what reduction in daily consumption is necessary, ACTEW shall have regard to daily consumption levels in the immediately preceding period, daily consumption levels in corresponding periods in previous years, weather forecasts, and any other relevant consideration.

At the 25% storage level, the ACT Government may declare a State of Emergency under the Emergency Management Act under which supply and/or use of water may be restricted to Emergency Use Only.

Notes:

1. This scheme applies to water drawn from ACTEW Corporation's potable water supply system only.
2. The "odds and evens" system means that, if your street number ends in an odd number (i.e. 1, 3, 5, 7 or 9), you can only water on days when the date also ends in an odd number. Similarly, if your street number ends in an even number (i.e. 0, 2, 4, 6 or 8) then you can only water on days when the date also ends in an even number – except for 31<sup>st</sup> day of any month (bonus day).
3. "Private" includes residential, business and Government and non-Government institutions.
4. "Public" includes government and privately operated for public use
5. Where customers can demonstrate serious detriment from application of restrictions, application can be made for an exemption or partial exemption. Applications for exemption must be made in writing and addressed to "Restriction Exemptions", ACTEW Corporation Limited, GPO Box 366, Canberra, ACT 2601. Exemptions or partial exemptions will only be granted in writing. Applications should include a statement of the reasons why an exemption or partial exemption is sought and set out, in particular, what serious detriment is claimed will be incurred if the application is not granted. Without limiting the grounds on which ACTEW might grant an exemption or partial exemption, applications may be granted where there is a compelling health or public hygiene reason or where compliance with restrictions would be likely to cause disproportionate or unintended financial damage to the applicant.
6. Summer means the period in which Canberra time is Australian Eastern Daylight Time (AEDT). Winter is the period in which Canberra time is Australian Eastern Standard Time (AEST).
