

Water Resources (Water management areas) Determination 2007 (No 1)

Disallowable Instrument DI2007—193

made under the

Water Resources Act 2007, Section 16 - Water management areas

1. Name of instrument

This instrument is the *Water Resources (Water management areas) Determination 2007 (No 1)*.

2. Commencement

This instrument commences on 1 August 2007

3. Determination of water management areas

Water management areas are shown in the map in Figure 1. Water management areas include one or more sub-catchment areas, as provided for by the water resources management plan (see Volume 3 *Think water, act water*) that was prepared under the repealed *Water Resources Act 1998* – as shown in Table 1.

4. Explanatory Notes

The boundaries of water management areas are based on watersheds. Where these do not line up with the ACT border, the water management areas are shown to extend into NSW. The ACT has rights to water from the Googong Dam Area, located in the Googong catchment in NSW, and has responsibility for managing that area. The inclusion of an area in NSW in Figure 1 is done to assist understanding and does not imply that the ACT has any rights or responsibilities in that area.

Jon Stanhope MLA
Minister for the Environment
31 July 2007

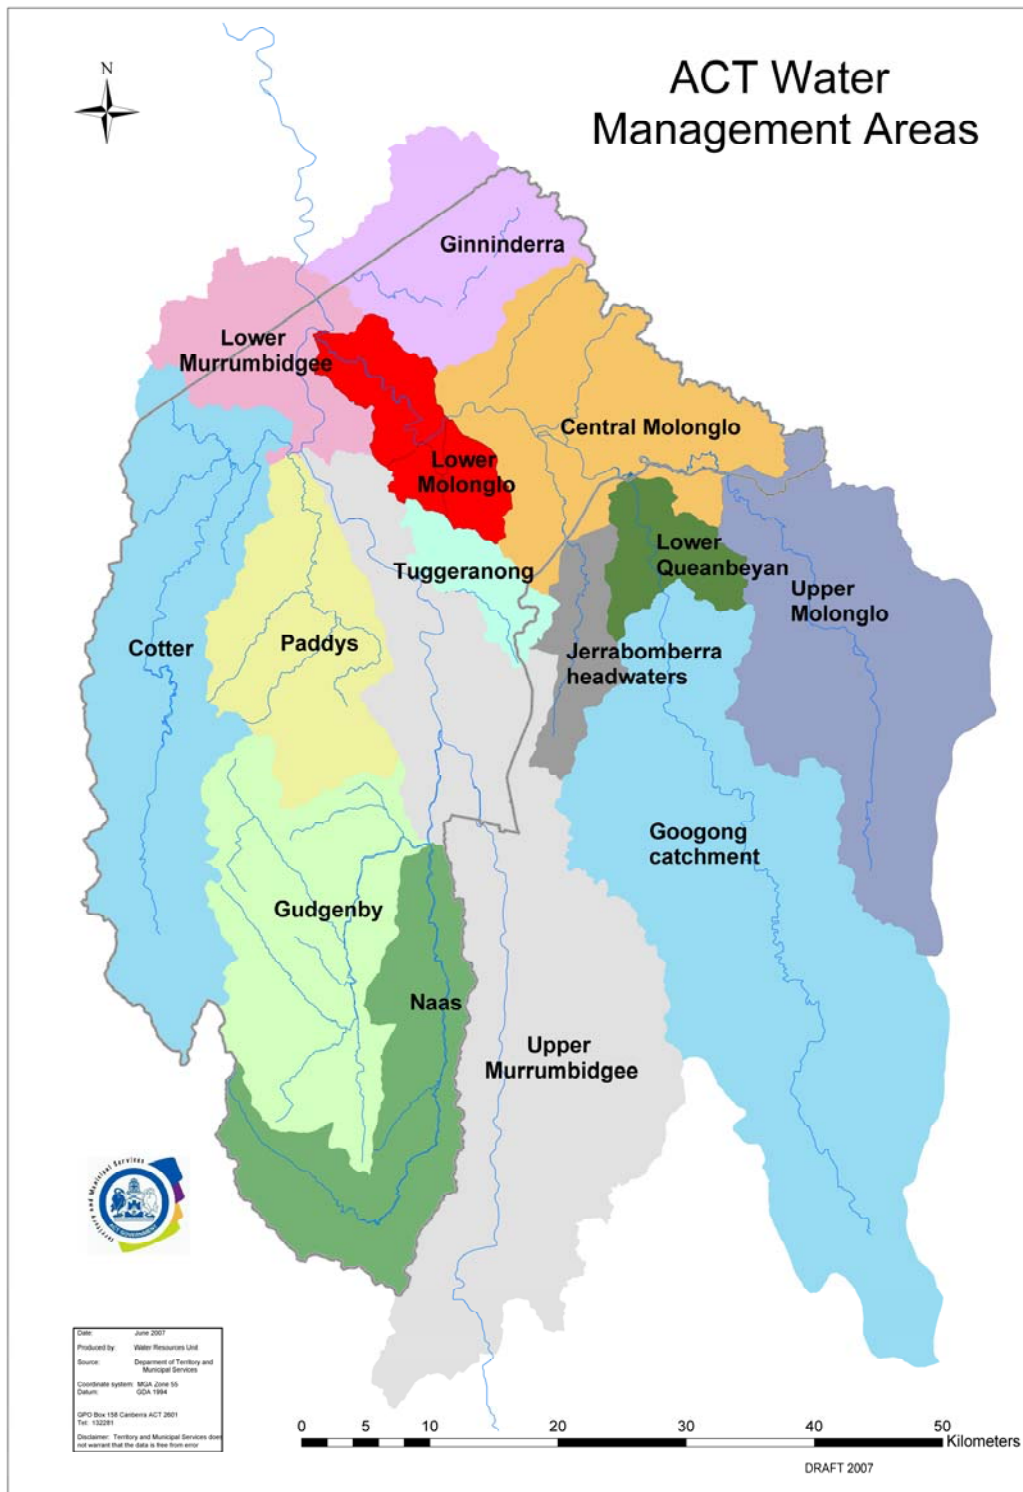

Figure 1: Map showing water management areas.

Table 1: Water management areas and the corresponding sub-catchment areas.

Water management area	Sub-catchment areas
Upper Murrumbidgee	Michelago Tharwa Kambah Guises Tennent
Lower Murrumbidgee	Uriarra Woodstock
Naas	Naas
Gudgenby	Gudgenby
Cotter	Corin Bendora Lower Cotter
Paddys	Paddys
Tuggeranong	Tuggeranong
Upper Molonglo	Upper Molonglo
Central Molonglo	Kowen Fyshwick Jerrabomberra Lake Burley Griffin Woolshed Sullivans
Lower Molonglo	Coppins Woden Weston
Lower Queanbeyan	Lower Queanbeyan
Jerrabomberra headwaters	Jerrabomberra headwaters
Googong catchment	Tinderry Googong Burra
Ginninderra	Gungahlin Lake Ginninderra Parkwood
