

# Utilities (Technical Regulation) (Listed Dams) Determination 2018

## Disallowable Instrument DI2018–234

made under the

***Utilities (Technical Regulation) Act 2014*, s 69 (Listing of certain dams)**

---

### **1 Name of instrument**

This instrument is the *Utilities (Technical Regulation) (Listed Dams) Determination 2018*.

### **2 Commencement**

This instrument commences on the day after it is notified.

### **3 Determination of listed dams**

Under s69(1)(c) of the *Utilities (Technical Regulation) Act 2014*, I determine the list of dams that present a risk of significant adverse effects on the community in the event of the failure of the dam as set out in the schedule.

### **4 Revocation**

The Utilities (Technical Regulation) Listed Dams Determination 2015 (No 1) (DI2015–44) is revoked.

*Note 1* The risk of adverse effects in the case of failure is NOT at all related to the risk of failure. A dam with an associated high risk of adverse impacts in the case of failure can be, and usually is, a safe dam, that is, its risk of failure is very low.

*Note 2* The dams register is available on the [Access Canberra website](#).
