# Introduction

## Name

The name of this code is **Residential Zones Development Code**.

## Application

This code applies to all development in the following residential zones

RZ1 – Suburban Zone

RZ2 – Suburban Core Zone

RZ3 - Urban Residential Zone

RZ4 - Medium Density Residential Zone

RZ5 - High Density Residential Zone

## National Capital Plan

Where a development is subject to special requirements under the National Capital Plan, or any relevant development control plan prepared under the National Capital Plan, the development cannot be inconsistent with the special requirements or development control plan. Where any provision of this code is inconsistent with special requirements under the National Capital Plan, or any relevant development control plan prepared under the National Capital Plan, that provision has no effect.

## Purpose

This code provides additional planning, design and environmental controls to support the objectives of the relevant residential zone.

It will be used by the Authority to assess development applications. It also offers guidance to intending applicants in designing development proposals and preparing development applications, and makes reference to other relevant codes, where appropriate.

## Structure

This code has an introduction, a reference to other relevant codes and the following parts:

**Part A – Residential housing development** makes reference to other development codes for single dwelling housing development and multi-unit housing development.

**Part B – Other forms of residential development**

**Part C – Demolition**

**Part D – Subdivision and Consolidation** contains provisions relating to residential subdivision and consolidation that are not covered by the Estate Development Code.

**Part E – Non-residential uses** provides controls that are applicable to forms of non-residential development located in a residential zone, but only where such uses are authorised by the P&D Act or a *lease*.

**Part F – Other development**

**Part G – General controls**

This code has a number of elements. Each element has one or more rules, and each rule has an associated criterion (unless the rule is mandatory). Rules provide quantitative, or definitive, controls. By contrast, criteria are chiefly qualitative in nature.

In some instances rules are mandatory. Such rules are accompanied by the words “This is a mandatory requirement. There is no applicable criterion.” Non-compliance with a mandatory rule will result in the refusal of the development application. Conversely, the words “There is no applicable rule” is found where a criterion only is applicable.

### **Assessment tracks**

Assessment tracks for particular developments are specified in the relevant residential zone development table.

Proposals in the **code track** must comply with all rules relevant to the development.

Proposals in the **merit track** and **impact track** must comply with a rule or its associated criterion, unless the rule is mandatory (ie. it has no related criterion). Where a rule is fully met, no reference to the related criterion needs to be made. Where there is a departure from a rule, or where a criterion only applies, the onus is on the applicant to demonstrate, through supporting drawings and/or written documentation, that the relevant criterion is satisfied. In addition, the applicant for proposals in the impact track must justify any non-compliance by reference to the Statement of Strategic Directions.

### **Code hierarchy**

Under the *Planning and Development Act 2007*, where more than one type of code applies to a development and there is inconsistency between provisions, the order of precedence is: precinct code, development code, and general code.

### **Definitions**

Defined terms, references to legislation and references to other documents are italicised.

Definitions of terms used in this code are listed in part 13 of the Territory Plan or, for terms applicable only to this code, associated with the respective rule.

### **Acronyms**

ACTPLA	ACT Planning and Land Authority
EDD	ACT Economic Development Directorate
EDP	estate development plan
EPA	ACT Environment Protection Authority
ESA	Emergency Services Authority
ESDD	ACT Environment and Sustainable Development Directorate
NCA	National Capital Authority
NCC	National Construction Code
P&D Act	Planning and Development Act 2007

## Relevant Development Codes and General Codes

Development codes that may be relevant to certain development or use in the residential zone are marked Y in table 1. Where more than one development code applies, and there is an inconsistency between the provisions of the codes, the residential zones development code shall prevail to the extent of that inconsistency.
