# Assessment Tracks

The following tables identify the additional prohibited development and additional merit track development for blocks and parcels shown in the Gungahlin Precinct Map (identified as PDn or MTn). Development that is exempt from requiring development approval, other prohibited development and the minimum assessment track applicable to each development proposal is set out in the relevant zone development table.

The following tables constitute part of the relevant zone development table.

# Introduction

## Name

The name of this code is **Gungahlin Precinct Code**.

## Application

The code applies to the Division of Gungahlin.

## Purpose

This code provides additional planning, design and environmental controls for specific areas or blocks and may also contain references to provisions in other codes.

In conjunction with other relevant codes it will be used by the *Authority* to assess development applications and offer guidance to intending applicants in designing development proposals and preparing development applications.

## Structure

This code contains additional rules and/or criteria for particular blocks or parcels identified as areas RCn on the precinct map, to be read in conjunction with the relevant development code. It may also contain sub-parts.

Each element has one or more rules and, unless the respective rule is mandatory, each rule has an associated criterion. Rules provide quantitative, or definitive, controls. By contrast, criteria are chiefly qualitative in nature.

In some instances rules are mandatory. Such rules are accompanied by the words “This is a mandatory requirement. There is no applicable criterion.” Non-compliance with a mandatory rule will result in the refusal of the development application. Conversely, the words “There is no applicable rule” is found where a criterion only is applicable.

## Code hierarchy

Under the *Planning and Development Act 2007*, where more than one type of code applies to a development, the order of precedence if there is inconsistency of provisions between codes is: precinct code, development code and general code.

If more than one precinct code applies to the site, the most recent precinct code takes precedence to the extent of any inconsistency.

## Definitions

Defined terms, references to legislation and other documents are italicised.

Definitions of terms used in this code are listed in part 13 of the Territory Plan or, for terms applicable only to this code, associated with the respective rule.

## Additional rules and criteria

This part applies to blocks and parcels identified in the Gungahlin Precinct Map (RCn). It should be read in conjunction with the relevant zone development code and related codes.

### RC1 – Gungahlin Town Centre

This part applies to blocks and parcels identified in area RC1 shown on the Gungahlin Precinct Map. RC1 includes the Gungahlin Town Centre.

**Gungahlin Town Centre** is the major hub for employment, shopping, social activities and public transport particularly serving suburbs within the Gungahlin district. **Gungahlin Town Centre** is bounded on the north-west by Gundaroo Drive, the south-west by Gungahlin Drive, Anthony Rolfe Avenue to the north, Manning Clark Crescent to the east and the Mulangari Grasslands in the south.

#### Application

This part of the **Precinct Code** applies to development on land in Gungahlin Town Centre in the District of Gungahlin as shown in figure 1.

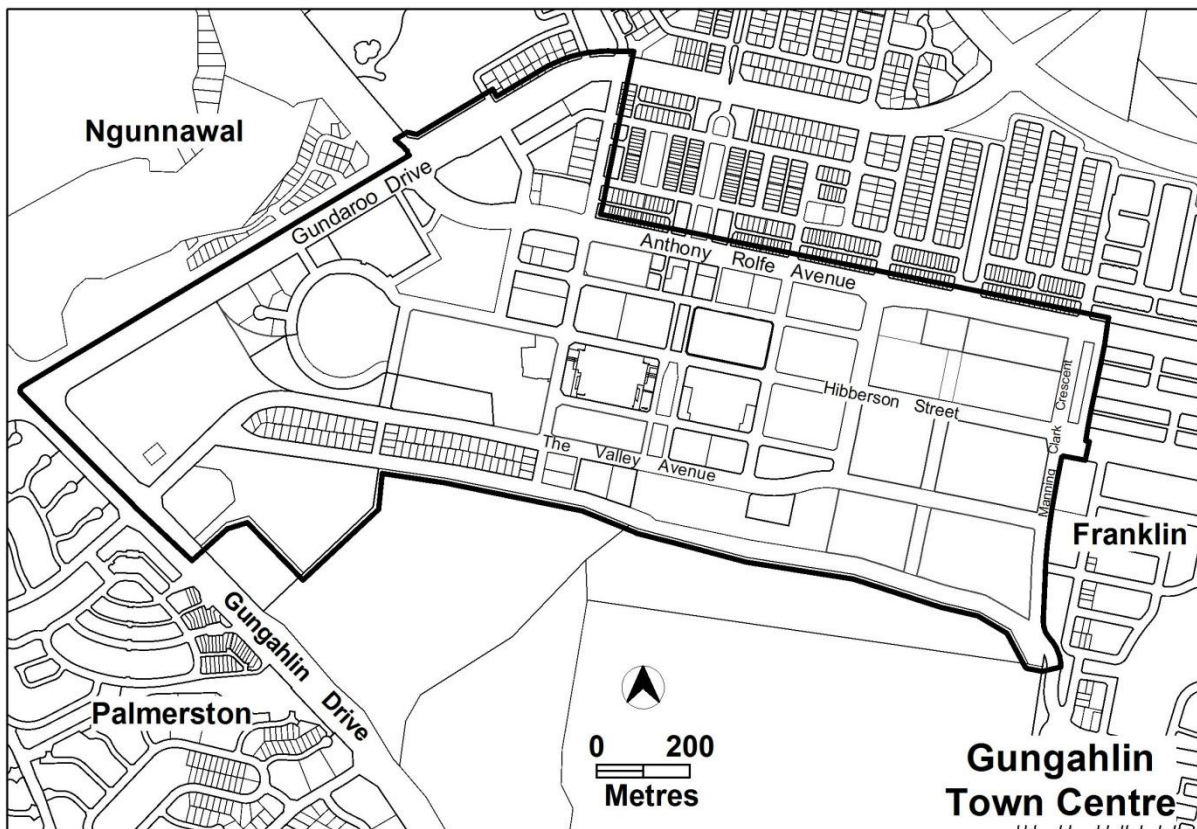

Figure 1

## Purpose

The purpose of the provisions relating to the Gungahlin Town Centre (RC1) is to:

- a) guide the design and assessment of *estate development plans* (subdivision proposals) in **Gungahlin Town Centre**
- b) inform the allocation of final zones at the time when a parcel of land ceases to have a future urban area (FUA) overlay (refer to note below) following subdivision
- c) guide the development of individual *blocks* in concert with other relevant codes under the *Territory Plan*
- d) support zone objectives and assessable uses in the development tables
- e) guide the development and management of the public realm.

A future urban area (FUA) overlay on the Territory Plan map identifies land that has yet to be developed. The final zoning, while generally indicated on the Territory Plan map, will be set after *an estate development plan* has been approved in accordance with the provisions of a relevant precinct code.

## Desired planning outcomes

The intent of the development controls is to:

- (a) provide a mix of land use types and densities
- (b) provide opportunities for people to live, work and recreate which delivers environmental, social and economic benefits for the community
- (c) balance and protect residential amenity with the commercial uses
- (d) provide a safe and vibrant night time economy
- (e) ensure retail activity is well distributed around the retail core and future sites are viable through inclusion of an anchor store
- (f) promote social inclusion through providing accessible commercial and community facilities
- (g) provide a structure to the town centre that is robust, while recognising the changing needs of the town centre
- (h) continue the 'main street' character to Hibberson Street that promotes quality of public realm and a 'human scale' to the built form
- (i) provide public spaces and a street network that promotes pedestrian movement, particularly along Hibberson Street and Gungahlin Place
- (j) provide opportunity for a variety of public transport
- (k) build upon the distinct public domain character and provide opportunity for variety and change in the public realm
- (l) encourage flexibility and innovation in design of the built form and open space
- (m) provide a street network designed for low vehicle speeds and easy pedestrian access
- (n) support a strong employment base in the district of Gungahlin
- (o) provide a business park within precinct 2b that contains a variety of building heights consistent with a campus style development
