Introduction

Name

The name of this code is **Strathnairn Precinct Code**.

Application

The code applies to the Division of Strathnairn.

Purpose

This code provides additional planning, design and environmental controls for specific areas or blocks and may also contain references to provisions in other codes.

In conjunction with other relevant codes it will be used by the *Authority* to assess development applications and offer guidance to intending applicants in designing development proposals and preparing development applications.

Structure

This code contains additional rules and/or criteria for particular blocks or parcels identified as areas RCn on the precinct map, to be read in conjunction with the relevant development code. It may also contain sub-parts.

Each element has one or more rules and, unless the respective rule is mandatory, each rule has an associated criterion. Rules provide quantitative, or definitive, controls. By contrast, criteria are chiefly qualitative in nature.

In some instances rules are mandatory. Such rules are accompanied by the words “This is a mandatory requirement. There is no applicable criterion.” Non-compliance with a mandatory rule will result in the refusal of the development application. Conversely, the words “There is no applicable rule” is found where a criterion only is applicable.

Code hierarchy

Under the *Planning and Development Act 2007*, where more than one type of code applies to a development, the order of precedence if there is inconsistency of provisions between codes is: precinct code, development code and general code.

If more than one precinct code applies to the site, the most recent precinct code takes precedence to the extent of any inconsistency.

Definitions

Defined terms, references to legislation and other documents are italicised.

Definitions of terms used in this code are listed in part 13 of the Territory Plan or, for terms applicable only to this code, associated with the respective rule.

- * Where utility service infrastructure is required in front of any walls, such as Water Meters, Mini Filters, Sewer and any other required service, walls may contain recesses to a maximum of 1.8m length and 0.8m depth or as agreed by the service provider.
Where blocks are subjected to two boundaries fronting a laneway as shown in Example C, a courtyard wall or fence treatment may be installed along laneway frontages on the boundary.
Where located above a retaining wall, fencing to be setback a minimum of 600mm from the boundary, providing sufficient space for planting. The maximum combined height of wall and fence is 2.2 metres from footpath level.
Side boundary fences may be of Timber Paling (hardwood lapped and capped) or Sheet Metal
