Device Name 2	eCash Cash Redemption Terminal
Category	Subsidiary Equipment
Specification Number	69-SER00
Software Version	2.3.41.80 or later
Specific Approval Conditions	
<ol style="list-style-type: none"> 1. The computer hosting the eBet Netcash CCCE SQL system must be physically bolted down in a secure area of the gaming venue with access only permitted to authorised+ venue personnel. 2. The system must be installed on a 'locked down" computer with a provision for a seal, where no external access devices that are capable of introducing new software or data are accessible on the system without breaking the seal. This allows access devices such as CDROM drives to facilitate upgrades etc. However, access to the drive without breaking the seal must be prevented. This may be achieved by the use of locking sealable faceplates over the drives. 3. The System, Windows 2000 operating system and MS SQL Server 2000 must be configured so that only the system application and related programs are executed on start-up. 4. Only those applications that are core to the system operation, and evaluated by the GMFT and approved by the Authority are permitted to be configured on a production system. 5. Any software tool which permits viewing/modification of the data that holds details of player's accounts and audit information must not be installed on the system and neither shall it be in possession of any eBet employee attending service calls. 6. Network facilities on the host system must be restricted to the provision of a network connection to the backup system and associated applications (such as entrance and cashier terminals). No "dial in" facility is permitted. 7. All gaming machines attached to a card-based gaming system must be capable of being operated using both the card-based system and coins or notes. 8. The system must be configured in such a way that only authorised personnel have access to critical functions/parameters setting and sensitive information contained in the system. 9. The system must be installed on a separate discrete network. 10. The system must be provided and operated with a dedicated Uninterruptible Power Supply (UPS). The UPS must provide sufficient capacity to allow the system, and any associated critical elements, to be shut down gracefully in the event of a power interruption. 11. The system interface card must be housed in a sealed enclosure, which requires access to the secure area of the Gaming Machine. 12. The system must be configured with automated backup facility. 13. The system's printer must be operational at all times the system is operating. 	
Specific Approval Conditions	
This approval of the above 'In-Venue Monitoring System' replaces the previous approval of 'In-Venue Monitoring System' as referred to in Notifiable Instrument NI2014-438 dated 28 August 2014.	
Operational Conditions	
Apart from Ticket-In Ticket-Out, cashless gaming facilities are not a subject of this approval.
