1. District Map

This policy applies to land within the area identified as the Inner North and City District in the map below.

Maps detailing specific assessment outcomes and requirements are included at the end of this policy.

2. Land Use Table

The following table specifies additional types of development and land uses that are assessable in this district. These are additional to the development types and land uses specified as assessable within the applicable zone policy.

The uses listed require development approval unless they meet the 'exempt development' definition of the *Planning Act 2023*. Development and land use types listed are defined in the Territory Plan Dictionary.

The table also specifies additional types of development and land uses that are prohibited in this district. These are prohibited, notwithstanding whether they are listed as assessable under the applicable land use policy. Development of prohibited uses may be considered under certain limited circumstances as outlined under Part 7.3 of the *Planning Act 2023*.

3. Policy Outcomes

Development proposals in the Inner North and City District will be assessed having regard to the key characteristics of the district and the policy outcomes to be achieved for the district. The policy outcomes to be achieved for Inner North and City District are derived from the Inner North and City District Strategy, that sets the vision and directions for the district.

The desired policy outcomes to be achieved for Inner North and City District include:

1. Protect, enhance and restore habitat values in key blue-green corridors including re-naturalisation of Sullivans Creek and its tributary waterways where possible, connections to Banksia Street and Dickson Wetlands and linkages between reserves, urban open space and Garden City precincts and application of water sensitive urban design.
2. Protect and enhance woodland connectivity between Black Mountain and Lyneham Ridge, and from Lake Burley Griffin through Mount Ainslie, Mount Majura and to Kenny, including through the installation of fauna-friendly road crossings where required.
3. Protect floorspace and development opportunities for future economic activities and employment to make sure the City Centre maintains its pre-eminent economic role.
4. Develop innovation precincts around economic assets in the City Centre (ANU/CSIRO and UNSW), Watson (ACU and AIE) and Campbell (ADFA).
5. Develop the City Centre as a multimodal transport hub including accommodating future light rail corridors, bus interchange functions and improved active travel infrastructure.
6. Plan in long term for future faster or high-speed rail connection to the City Centre via East Canberra District and potential support infrastructure.
7. Pursue innovative models for future community and recreational facilities to support expected population growth, given constrained land supply.
8. Revise City Plan to guide high quality future development of the City Centre and reflect the City Centre entertainment precinct.

The desired policy outcomes to be achieved for Inner North and City District include:

9. The City Centre Entertainment Precinct is a lively and highly accessible precinct which is characterised by its night-time and entertainment economy, the leading uses of which are entertainment and leisure.
 10. Develop economic and mixed-use hubs at and nearby light rail stops along the Northbourne Avenue corridor based on sustainable urban development principles.
 11. Make sure future redevelopment contributes towards living infrastructure aims in built up areas including the City Centre.
-

4. Assessment Outcomes

Consistent with the district policy outcomes, development proposals in the Inner North and City District must demonstrate that they are consistent with any area specific assessment outcomes that may apply, as well as the relevant zone assessment outcomes.

In demonstrating compliance with the assessment outcomes, consideration is to be given to the relevant design guides and may be given to planning technical specifications which may serve as a benchmark. While all assessment outcomes are to be met, not all outcomes are covered by design guidance and/or planning technical specifications.

Where a proposed development complies with relevant provisions in the design guide and/or planning technical specification and the development comprehensively addresses the assessment outcome, further assessment regarding that assessment outcome will not be required.

Where a design guide applies to a development, the proposal must demonstrate that it is consistent with the relevant guidance. More information is available in the design guide. Given the nature of the design guides, different design responses are possible to meet the same assessment outcomes.

The Territory Planning Authority may consider advice or written support from a referral entity to demonstrate compliance with a relevant assessment outcome. Where endorsement from an entity is noted as a planning technical specification, entity referral will be required.

Specific assessment outcomes

There are no area specific assessment outcomes to consider for the Inner North and City District. Development needs to comply with relevant zone assessment outcomes.

5. Assessment Requirements

Assessment requirements set the mandatory development controls for specific areas, and sites within the Inner North and City District. These provisions are in addition to and, where

inconsistencies occur, prevail over any assessment requirements that are provided in the relevant zones policy.

Development proposals in the Inner North and City District must meet the following requirements. Localities that are not listed do not have assessment requirements.

Locality	Assessment requirement	Reference
Ainslie	<ol style="list-style-type: none"> On Block 6 Section 25 co-housing development undertaken by the Demonstration Housing Project lessee(s) identified on a register published on an ACT Government website complies with the following: <ol style="list-style-type: none"> Does not exceed 3 dwellings. Subdivision under the <i>Unit Titles Act 2001</i> is permitted. A maximum of 3 dwellings can be unit titled. 	Block 6 Section 25
Braddon	<ol style="list-style-type: none"> Building heights do not exceed RL617m In RZ5 the minimum number of storeys is 3. In accordance with Figure 8, blocks in the 'RC2' area zoned CZ5 comply with all of the following: <ol style="list-style-type: none"> The subdivision of sites is consistent with the pattern of proposed roads on Figure 9. Off-site works required include a provision of a minimum 222 car parking spaces across shaded areas on Figure 9 or demonstration adequate on-street parking is provided, cycle & pedestrian paths as required to connect to network, provision of a service lane, signalised intersections as required. Landscaping to include high quality landscaping to the Cooyong and Donaldson Street frontages and provide for on-site stormwater infiltration. Roof top communal garden space is encouraged. Ground floor facades of buildings front Cooyong Street and Ainslie Avenue present a varied and interesting design. In CZ3 car parking provided on blocks, other than for display purposes, is not visible from the street. 	<p>Figure 8</p> <p>Figure 9</p>
City	<ol style="list-style-type: none"> Building heights do not exceed RL617m. Roof top plant that is set back and screened from the street is not included in the maximum building height, provided screening height is not excessive and does not exceed RL617m. Ainslie Avenue between Cooyong Street and Bunda Street remains permanently opened to the public for pedestrian access at ground floor level. Note: The Territory retains the right, through relevant provisions in any lease for the land, to utilise this section of Ainslie Avenue as a public transport corridor. Development within the City demonstrates consistency with the following: <ol style="list-style-type: none"> New development and public realm outcomes respect the geometry and intent of the Griffin Plan and emphasises the national significance of the main approach routes and avenues. The hierarchy of buildings and landscape is recognised and key landmark building positions are defined for special significance in use or build form with height up to RL617m. 	

Locality	Assessment requirement	Reference
	<ul style="list-style-type: none"> c) Views, including to the Brindabellas, Black Mountain and Mount Ainslie, City Hill and Lake Burley Griffin are maintained and enhanced where possible. d) Establish a defined street wall of maximum 5-8 storeys with human scale building articulation. e) Transition built form height when interfacing adjacent lower scale buildings. f) Development on larger blocks is broken up by new laneways and cross-block links that are open to the public at all times and contribute to pedestrian wayfinding. g) Providing 'air rights' through development over public space is not encouraged. h) Integrate landscape into building sites to reinforce Canberra's 'City in the Landscape' character. 	
	<p>9. Building design achieves the following where relevant:</p> <ul style="list-style-type: none"> a) Generally joined at ground level to provide a continuous streetscape edge, however tower elements above 5 storeys are set back. b) Accentuate street corners and provide public amenity at ground level through new development. c) Lower levels of buildings offer engagement with the street through uses such as apartments, hotels rooms or offices with windows and balconies that provide passive surveillance. d) Buildings provide ground floor frontages and uses to streets that are active and interesting. e) Clear glazing is maximised and retained with minimal signage. f) Blank walls and podium carpark screens are not supported at lower levels. g) Blank walls, areas of louvres and roller shutters are minimised. Where blank walls are unavoidable, alternative treatments are used such as integration of artwork. h) Service rooms are internalised or away from the main streets and pedestrian areas on ground floor and/or located to other levels where possible. i) Provide weather protection to pedestrian walkways by awnings or colonnades. j) Colonnades are provided where an existing feature on adjoining buildings. 	
	<p>10. In accordance with Figure 10, buildings fronting main pedestrian areas provide for uses that generate activity such as retail, restaurants or community uses.</p>	Figure 10
	<p>11. In accordance with Figure 11, in 'City Area 1':</p> <ul style="list-style-type: none"> a) For buildings fronting Childers, Hutton, and Kingsley Streets maximum building heights up to 7 storeys are considered where development meets all the following: <ul style="list-style-type: none"> i) building elements higher than 4 storeys are set back from the front boundary. ii) floor to floor height of the ground floor level of buildings facing Childers Street is 4.8m. iii) awnings provided along Childers Street establish a pedestrian scale. 	Figure 11

Locality	Assessment requirement	Reference
	<ul style="list-style-type: none"> b) For buildings fronting Marcus Clarke Street (between Barry Drive and University Avenue) maximum building heights up to RL617m may be considered where development meets all the following: <ul style="list-style-type: none"> i) the built form provides a defined parapet at the 9th storey level. ii) building elements higher than 9 storeys are recessed. iii) floor to floor height of the ground floor level of buildings facing Marcus Clarke Street is 4.8 m. iv) awnings or similar are provided along Marcus Clarke Street. c) For buildings fronting Barry Drive maximum building heights up to RL617m at the corner of Marcus Clarke Street may be considered where development meets all the following: <ul style="list-style-type: none"> i) buildings step up from 7 storeys adjacent to Kingsley Street to RL617m at the corner of Marcus Clarke Street. ii) overshadowing of open space and existing residential buildings is minimal. iii) the built form provides a defined parapet at the ninth storey level. iv) building elements higher than 9 storeys are recessed. 	
	<p>12. In accordance with Figure 11, in 'City Area 2':</p> <ul style="list-style-type: none"> a) For buildings fronting corner of Ellery Crescent and Marcus Clarke Street maximum building heights up to RL617m may be considered provided building heights across Marcus Clarke Street have an integrated design. b) For the remainder of Section 20, maximum building heights are sensitive to the height and scale of surrounding heritage listed buildings including National Film and Sound Archive, Shine Dome, Ian Potter House and the ANU Schools of Art and Music. c) Accessible pedestrian space is provided at the intersection of Ellery Crescent and Marcus Clarke Street that links form adjacent development on sections 61, 90, 91 and 92 to development on section 20 and the ANU School of Arts via the proposed bridge over Ellery Crescent. 	Figure 11
	<p>13. In accordance with Figure 11, in 'City Area 3', development in areas adjacent to Section 1 is compatible with the built form and historic character of the Melbourne building.</p> <p>14. In accordance with Figure 11, in 'City Area 4' development in areas adjacent to Section 48 is compatible with the built form and historic character of the Sydney building.</p>	Figure 11
	<p>15. In accordance with Figures 11 and 12, in 'City Area 5':</p> <ul style="list-style-type: none"> a) Redevelopment within Garema Place (Figure 12) is consistent with a comprehensive design for the whole area. b) Building height is no higher than the heights of existing approved buildings. 	Figure 11
	<p>16. In accordance with Figures 11 and 12, in 'City Area 6':</p>	Figures 11, 12

Locality	Assessment requirement	Reference
	<ul style="list-style-type: none"> a) The height of a building to its main parapet line does not exceed the relevant maximum building height shown on Figure 12. b) No part of any building is more than: <ul style="list-style-type: none"> i) 28m including roof top plant; or ii) 23m for section 15 blocks 1, 2, 5 and 12. iii) however, minor variations of building heights and setbacks may be permitted in special circumstances such as to allow for special architectural features to enhance building facades. Rebuilding up to the existing approved height limit is permitted. 	<p>Figures 11, 12</p> <p>Figure 12</p>
	<p>17. In accordance with Figure 11, in 'City Area 8':</p> <ul style="list-style-type: none"> a) Development on City Section 6 Block 2 addresses Edinburgh Avenue and abuts the front property boundary on London Circuit. b) On city sections 2, 3, 5, 11, 12, 22, 23, 26, 32, 38, 51, 53 and 56, where comprehensive redevelopment is proposed to an intensive inner-city scale, each new building is consistent with a comprehensive design for the whole section. Existing low-rise buildings or building elements that are integral to the comprehensive design may be required to retain their existing heights. c) Development on existing car parks (Figure 13) retain or improve the existing level of car parking, accommodates onsite any additional car parking required by the development, ensures that car parking remains available for public access. However, alternative proposals may be considered where it is demonstrated there is enough car parking for the needs of the centre as a whole and the development does not adversely affect the overall function of the centre in terms of economic, social, traffic and parking and urban design impacts. 	<p>Figure 11</p> <p>Figure 13</p>
	<p>18. In accordance with Figure 14, within the City Centre Entertainment Precinct:</p> <ul style="list-style-type: none"> a) development supports entertainment uses that: <ul style="list-style-type: none"> i) are appropriate to the location and scale of the precinct. ii) contribute to a thriving, lively and inclusive precinct and night time economy across 24 hour, weekly and seasonal timeframes. iii) encourage a vibrant mix of uses to enhance diverse user experiences. b) development design, siting, materials, and construction are to: <ul style="list-style-type: none"> i) enable live performance and entertainment options for a diverse range of interests, abilities, and demographics to reflect the Canberra community and visitors to our city. ii) support the health, wellbeing and amenity of occupants in a lively, higher-noise urban environment. iii) integrate with surrounding uses and public space. c) All noise emitting development must demonstrate how low frequency noise associated with live entertainment 	<p>Figure 14</p>

Locality	Assessment requirement	Reference
	<p>and amplified music has been considered and applied in building design, siting and materials.</p> <p>d) All noise receiving development must demonstrate how low frequency noise associated with live entertainment and amplified music noise has been considered and applied in building design, siting, and materials. , in order to achieve indoor noise levels compliant with AS2107:2000 ‘satisfactory levels’ and an equivalent internal noise level, for low frequency noise which in habitable rooms including bedrooms (night-time) is 43dBC demonstrated in any one-third octave band between and including 63Hz and 125Hz.</p> <p>e) Note: The City Centre Entertainment Precinct area is potentially affected by noise from external sources, including low frequency noise from live entertainment and amplified music.</p> <p>f) All development must demonstrate how (siting, design and operational) considerations are applied to minimise adverse impacts of development on surrounding uses and the amenity of other users. Consideration should be given to the likely hours and days of use and operation when minimising adverse impacts. This includes impacts between:</p> <ul style="list-style-type: none"> i) residential uses; ii) non-residential and residential uses; and iii) non-residential uses <p>Note 1: for the purposes of entertainment precincts, noise emitting development includes but is not limited to the following uses: club, drink establishment, emergency services facility, hotel, indoor recreation facility, indoor entertainment facility, industry (except light industry), outdoor recreation facility, restaurant. Noise receiving development includes but is not limited to the following uses: residential uses, restaurant, retail uses, hotel, community facilities.</p> <p>Note 2: A condition of development approval may be imposed to ensure construction compliance with an approved noise management plan if required elsewhere under the Territory Plan.</p> <p>g) Basement indoor entertainment facility uses are excluded from the definition of gross floor area (GFA) where limited by a lease or other Territory Plan requirements. To qualify, development must do all of the following:</p> <ul style="list-style-type: none"> i) meet any applicable conditions of Development Approval, including Lease Variation if required; ii) be constructed in accordance with an Environment Protection Authority endorsed Noise Management Plan; iii) provide an indoor entertainment use located below Natural Ground Level; iv) remain part of a registered Building Management Statement; 	

Locality	Assessment requirement	Reference
	<p>v) make building end of trip facilities available to indoor entertainment employees.</p> <p>Note: A development that includes entertainment uses both above and below NGL, can apply the GFA exemption for the entertainment use below NGL provided the above qualifications are met.</p>	
Dickson	<p>19. Any development of public carparking indicated by shaded areas on Figure 15 retains or improves the existing number of publicly available car parking spaces in addition to providing on site car parking that is generated by the development.</p> <p>20. In accordance with Figure 16, active frontages are provided to encourage uses that create activity, clear display windows and weather protection for pedestrians.</p> <p>21. The minimum ground floor to ceiling height is 4m, unless demonstrated the building is adaptable for retail and service trade uses.</p> <p>22. In Section 30, buildings do not unreasonably overshadow main pedestrian areas indicated by hatched areas on Figure 16</p> <p>23. No new building, except basement, is permitted within the 'library buffer area'. The 'library buffer area' is defined as the area measured from any point on each boundary of block 13 section 30 Dickson for a minimum distance of 10 metres.</p>	<p>Figure 15</p> <p>Figure 16</p> <p>Figure 16</p>
Downer	<p>24. In accordance with Figure 17, in Area A:</p> <p>a) The following uses are only permitted at ground floor level:</p> <ul style="list-style-type: none"> i) office; ii) personal service; iii) community activity centre; iv) health facility. <p>This does not exclude other uses from the ground floor level.</p> <p>b) the total maximum gross floor area of the following uses is:</p> <ul style="list-style-type: none"> i) office – 250m²; ii) personal service – 250m². <p>This does not apply to community activity centre or health facility.</p> <p>c) The maximum number of dwellings is 300</p> <p>25. In accordance with Figure 18, in Areas A and B:</p> <p>a) Maximum building height is:</p> <ul style="list-style-type: none"> i) Area A – 4 storeys; ii) Area B – 2 storeys. <p>b) buildings fronting Bradfield Street or Melba Street are setback a minimum of 30 metres from the boundary, unless demonstrated that the heritage listed trees on the boundaries fronting Bradfield and Melba Streets are not adversely impacted by development.</p> <p>c) communal open space is provided by central courtyards, located on both sides of the public roads, of sufficient size to allow deep-root planting for trees and incorporate existing mature trees, including all heritage-listed trees and elements of the old school courtyard.</p>	<p>Figure 17</p>

Locality	Assessment requirement	Reference
	26. Site access is provided by development of publicly accessible roads from Bradfield Street and from Melba Street.	
Lyneham	<p>27. On Blocks 24 and 25 Section 38 community housing development undertaken by the Demonstration Housing Project lessee(s) identified on a register published on an ACT Government website complies with the following:</p> <ul style="list-style-type: none"> a) does not exceed 9 dwellings. b) Subdivision under the <i>Unit Titles Act 2001</i> is prohibited. <p>28. A maximum of 3 dwellings can be unit titled.</p> <p>29. Demonstration housing (community housing) is permitted on Blocks 24 and 25 Section 38 Lyneham for a maximum of 9 dwellings across both blocks – refer to District Specification for applicable specifications.</p> <p><u>Note:</u> For this development community housing is not considered an apartment as defined by the Territory Plan.</p>	Blocks 24, 25 Section 38
Lyneham – Kamberra Estate	<p>30. For development subject to the National Capital Plan, Development applications are supported by written documentation demonstrating compliance against the relevant special requirements of the National Capital Plan, namely Part Four (B) – Special Requirements for Territory Land; Section 4.28 City and Gateway Corridor.</p> <p>31. Development complies with the following:</p> <ul style="list-style-type: none"> a) Appropriately responds to Sullivans Creek in regard to: <ul style="list-style-type: none"> i) flood risk. Where flood impacts on development, subdivision design application identifies a minimum setback for development. ii) role of the riparian corridor. b) Provide an infrastructure corridor for existing and future utility services. c) Demonstrated adequate space for active travel routes and open spaces for the use and enjoyment of the local community and commuters. d) Improve the landscape quality and setting on Sullivans Creek. e) Development of b) and d) is completed prior to or at the same stage as surrounding residential development. <p>32. For land contained within the setback area to Sullivans Creek, development is limited to:</p> <ul style="list-style-type: none"> a) Works to mitigate flooding. b) Works which maintain or increase flood conveyance capacity and storage volume for Sullivans Creek. c) Landscaping or minor public infrastructure to improve visual and environmental amenity. d) High quality and visually interesting screening of utility or flood mitigation works and infrastructure. e) Works relating to utility infrastructure that take place predominantly or entirely below natural ground level. f) Works to promote active travel and/or public open areas for recreation and leisure. g) Communal open space, private open space and courtyard walls required by a development code. h) Works to increase ‘naturalisation’ of Sullivans Creek through the use of natural construction materials and vegetation. 	

Locality	Assessment requirement	Reference
	<p>33. For site access and internal road layout, the following is endorsed by Transport Canberra and City Services (TCCS):</p> <ul style="list-style-type: none"> a) A transport impact assessment, prepared by a suitably qualified professional. b) Location, nature and number of new and existing external vehicular site access points to/from the Kamberra Winery Estate area. c) Sullivans Creek active travel connection. <p>Plans and drawings clearly demonstrate that the development is consistent with TCCS endorsements for a, b and c.</p> <p>34. The internal road layout complies with all of the following:</p> <ul style="list-style-type: none"> a) Incorporates a parallel access street along Sullivans Creek. b) Prioritises pedestrians and cyclists particularly where the 'internal pedestrian and bicycle network', intersects with internal roads. c) Minimise the amount of road in favour of soft landscape areas. <p>35. For development other than residential, development is located to comply with all of the following:</p> <ul style="list-style-type: none"> a) In close proximity to and easily accessible from site access points and the Phillip Avenue light rail stop. b) After a. has occurred, along the Federal Highway primarily closer to the Phillip Avenue intersection. <p>36. In accordance with Figure 18, development within 'Sullivans Creek active travel connections', 'mid-block links', 'end-block links' and 'internal pedestrian and bicycle network' comply with all of the following:</p> <ul style="list-style-type: none"> a) Provide safe, efficient and unimpeded public access to pedestrian and cyclists at all times. b) Identifies and provides the recreational and leisure needs of the local community. c) Where these areas intersect with roads and vehicular access ways, demonstrate how priority is given to pedestrians and cyclists through traffic calming measures such as slow speed areas, shared spaces and refuge islands. d) All areas provide adequate irrigation for landscaped areas and high-quality fit-for-purpose paving and finishes. e) Are completed prior to or at the same stage as surrounding residential development. <p>37. Open space areas comply with all of the following:</p> <ul style="list-style-type: none"> a) Open space areas that are located within the 1% AEP (1 in 100 year) flood extent for Sullivans Creek are not used for activities that can put vulnerable users (such as children's playgrounds) at risk from flooding. b) Not predominantly located in areas which limit the useability of open space such as, but not limited to, regulated tree protection areas. c) Demonstrate that the minimum area is adequate to accommodate the current and future residents, workforce and visitors to the site. 	Figure 18

Locality	Assessment requirement	Reference
	<p>38. In accordance with Figure 18, 'Mid-block links' and 'end-block links' comply with all of the following:</p> <ul style="list-style-type: none"> a) Are in a location generally in accordance with Figure 18 and aligns with the community path system through the area. b) Aligns with the light rail station and crossing points to reduce informal light rail crossings for cyclists and pedestrians (where relevant). c) Provides unimpeded public pedestrian and bicycle access at all times from the Federal Highway to the Sullivans Creek 'active travel connection'. d) Connects with the 'internal pedestrian and bicycle network' to provide a safe and efficient pedestrian and bicycle network. e) A landscape corridor, which includes a path, approximately 10 metres wide but not less than 6 metres wide at any point to accommodate all likely users, and can accommodate potential future path widening without impacts on planted trees. f) Vehicular access is not permitted within or along the 'mid-block links' and 'end-block links'. 	Figure 18
	<p>39. In accordance with Figure 18, the 'Sullivans Creek active travel connection' complies with all of the following:</p> <ul style="list-style-type: none"> a) The 'Sullivans Creek active travel connection' is in a location generally in accordance with Figure 19 and aligns with: <ul style="list-style-type: none"> i) the community path system through the area. ii) the light rail station and crossing points to reduce informal light rail crossings for cyclists and pedestrians. b) Provides unimpeded public pedestrian and bicycle access at all times for the length of the active travel connection shown in Figure 19. c) Exclusively utilises routes which are not also used by vehicles. d) Connects with the 'internal pedestrian and bicycle network' to provide a safe and efficient pedestrian and bicycle network. e) Is a landscape corridor approximately 10 metres wide but not less than 6 metres wide at the narrowest point and contains all of the following: <ul style="list-style-type: none"> i) a shared path for pedestrians and cyclists; ii) the landscape corridor and path are both adequate in width to meet the current and future demand of usage including potential future path widening without impacts on planted trees. 	Figure 18
	<p>40. For multi-unit housing, dwellings numbers across the estate area comply with:</p> <ul style="list-style-type: none"> a) Minimum – 2,000 dwellings. b) Maximum – 2500 dwellings, or alternatively 250,000m² GFA. 	
	<p>41. Total maximum gross floor area across the estate area for all non-retail commercial use – 30,000m².</p>	
	<p>42. Development must demonstrate that a minimum gross floor area of 1500m² of community use has already and/or will be</p>	

Locality	Assessment requirement	Reference
	provided across the Kamberra Winery Estate area (including indicative location/s).	
	43. The minimum front boundary setback to Flemington Road is 6m.	
	44. The minimum setback from the centreline of the Sullivans Creek stormwater easement to development is 20 metres, unless it is demonstrated that all of the following can be achieved within the nominated setback: <ul style="list-style-type: none"> a) Adequate space for development in Sullivan Creek setback area. b) Appropriate waterway management practices to facilitate the functioning of riparian zones. c) Adequate space to support and enhance wildlife connectivity. d) Adequate space for active travel routes. e) Recommendations of a TCCS endorsed flood risk study. A reduced setback is to be endorsed by the Conservator of Flora and Fauna.	
	45. This applies to dwellings on the block and dwellings on adjoining blocks. Transfer of noise between noise sources and habitable rooms, particularly bedrooms, are minimised through the siting, design and layouts of buildings. For the purpose of this specification, noise sources include, but are not limited to, garage doors, driveways, service areas, plant rooms, building services, mechanical equipment, communal open space and circulation areas.	
	46. A development application must be accompanied by a section plan that demonstrates that sensitive land uses such as residential uses on the site can be adequately attenuated from noise emanating from Exhibition Park in Canberra (EPIC) and Thoroughbred Park. The section plan must be endorsed by the EPA and planning and land authority prior to the development application being lodged. The section plan must include: <ul style="list-style-type: none"> a) An acoustic assessment that includes as inputs real world monitoring of events at EPIC and Thoroughbred Park including Summernats, Royal Canberra Show, music festivals, race days and events. This must take into consideration all current and permitted activities at Exhibition Park in Canberra (EPIC) and Thoroughbred Park. b) Details on the location, use, design and materials of building/s containing sensitive land uses to demonstrate that noise attenuation can be adequately achieved to protect the occupants from excessive noise intrusion, including low frequency noise typically emanating from outdoor music festivals and the like. c) Demonstration that the indicative buildings detailed in b) are capable of compliance against Territory Plan requirements. d) How development on the site (including proposed uses) will assist in ameliorating noise transmission to sensitive uses on the site. 	

Locality	Assessment requirement	Reference
	<p>Development on the site must be consistent with the endorsed section plan.</p> <p>For this specification, sensitive uses are:</p> <ul style="list-style-type: none"> a) Residential dwellings. b) Retirement village. c) Supportive housing. d) Community housing. 	
	<p>47. The following uses are permitted if they are located in buildings designed to comply with noise limits as outlined in schedule 2 of the Environment Protection Regulation, 2005:</p> <ul style="list-style-type: none"> a) Shop. b) Office. c) Restaurant. d) Drink establishment. e) Indoor recreation facility. f) Community facilities. g) Commercial accommodation unit. 	
	<p>48. Vehicular access to individual development, including crossovers and driveways, are designed and constructed to be co-located/shared with adjoining current or future development.</p>	
	<p>49. Pedestrian and cyclist access to blocks are clearly separated from vehicular access and be distinguishable through surface materials, level changes, landscaping and/or slow-speed shared pedestrian road zones.</p>	
	<p>50. For multi-unit housing, the maximum parking provision rate is:</p> <ul style="list-style-type: none"> a) Studio or one-bedroom dwelling – 1 space maximum. b) Two-bedroom dwelling – 1.3 spaces maximum. c) Three or more bedroom dwelling – 1.5 spaces. d) Every 8 dwellings – 1 visitor space. <p>Note 2: Parking calculations are rounded up to the nearest whole number.</p>	
	<p>51. Visitor car parking spaces are allocated for visitors of occupants of the residential parts of the development.</p>	
	<p>52. Visitor car parking spaces are conveniently located for visitors to the development and are not allocated to any other purpose, including private spaces for dwellings or workers of the commercial components of the development.</p>	
	<p>53. Adequate spaces and areas, suitably screened from public view, are provided for the loading and unloading of service vehicles.</p>	
	<p>54. Vehicle parking is only permitted in a basement. On grade, podium or other above ground parking is only permitted where the following is met:</p> <ul style="list-style-type: none"> a) The parking area is located away from the Federal Highway and Flemington Road and is suitably screened through use of buildings, communal open space area, private open space and/or landscaping. 	
	<p>55. For sites less than 3,000m², the development complies with the Environment Protection Authority Environment Protection Guidelines for Construction and Land Development in the ACT.</p>	

Locality	Assessment requirement	Reference
	<p>56. An environmental assessment report for the development is endorsed by the Environment Protection Authority. Note: A condition of development approval may be imposed to ensure compliance with the endorsed site assessment report.</p> <p>57. An 'Unanticipated Discovery Protocol' which includes assessment and management of any unexpected heritage discoveries during construction is endorsed by the ACT Heritage Council. Note: A condition of development approval may be imposed to ensure compliance with this specification.</p> <p>58. Development applications must be accompanied by evidence demonstrating that further consultation with Representative Aboriginal Organisations regarding the findings and recommendations of the 2016 and 2019 Cultural Heritage Assessments has been undertaken. Outcomes of this consultation will be submitted to the ACT Heritage Council, for further advice on any Heritage Act 2004 considerations for proposed development.</p>	
Lyneham – Yowani Estate	<p>59. For development subject to the National Capital Plan, Development applications are supported by written documentation demonstrating compliance against the relevant special requirements of the National Capital Plan, namely Part Four (B) – Special Requirements for Territory Land; Section 4.28 City and Gateway Corridor.</p> <p>60. The following is to be endorsed by TCCS:</p> <ul style="list-style-type: none"> a) A transport impact assessment, prepared by a suitably qualified professional. b) Location, nature and number of new and existing external vehicular site access points to/from the site. c) Sullivans Creek active travel connection. <p>61. The number of new and existing vehicular access points from/to the site and to/from Northbourne Avenue is minimised.</p> <p>62. The internal road layout for the site complies with all the following:</p> <ul style="list-style-type: none"> a) Incorporates a parallel access street generally along the Northbourne Avenue frontage. b) Prioritises pedestrians and cyclists particularly where the 'internal pedestrian and bicycle network' or 'mid-block links' intersect with internal roads. c) Minimises the amount of impervious surfaces within the road reserve in favour of soft landscape areas. <p>63. For development other than residential use, development is located to comply with all of the following:</p> <ul style="list-style-type: none"> a) In the south-eastern portion of the site. b) Close to and easily accessible from site access points and the Swindon Street light rail stop. c) After the above two points have occurred, along Northbourne Avenue and the Swinden Street extension, primarily adjoining or near other non-residential development. <p><u>Note:</u> This does not preclude residential use from occurring in the above areas on the site.</p>	

Locality	Assessment requirement	Reference
	<p>64. For 'open space areas', 'Sullivans Creek active travel connections' and 'mid-block links' identified in Figure 19, and for the 'internal pedestrian and bicycle network', development must comply with all the following:</p> <ul style="list-style-type: none"> a) Provide safe, efficient, and unimpeded public access to pedestrian and cyclists at all times. b) Identify and provide the recreational and leisure needs of the local community, where these areas intersect with roads and vehicular access ways. c) Demonstrate how priority is given to pedestrians and cyclists through traffic calming measures such as slow speed areas, shared spaces and refuge islands. d) Provide adequate lighting (that does not impact on the amenity of adjoining development) and passive and perceived surveillance at all times. e) Be limited to planting area, surface landscaping, buildings and structures that are consistent with active travel pathways or are open and do not limit accessibility. f) Provide adequate irrigation for landscaped areas and high-quality fit-for-purpose paving and finishes. g) Are completed prior to or at the same stage as surrounding residential development. <p>65. An open space needs assessment is undertaken by a 'suitably qualified professional' that:</p> <ul style="list-style-type: none"> a) Demonstrates that at least one open space area is within accessible walking distances for all residential use development within the site. b) Specifies a minimum 'usable' area of open space across the site that is adequate to accommodate the current and future on-site population. c) Specifies the amount of open space areas to achieve equitable access and adequate space per area for all current and future residential use development. d) Identifies areas, facilities and equipment needed by the local community, including high quality children's play spaces, kick-about area recreation facilities (e.g. bbq facilities, picnic tables, exercise equipment etc.). <p>Note: Findings of the open space needs assessment are clearly shown on plans and drawings.</p> <p>66. For 'mid-block links' shown in Figure 19, 'mid-block links' comply with all the following:</p> <ul style="list-style-type: none"> a) Are in a location generally in accordance with Figure 19 and align with the community path system through the area. b) Provide unimpeded public pedestrian and bicycle access at all times from Northbourne Avenue to the Sullivans Creek 'external active travel route'. c) Connect with 'internal pedestrian and bicycle network' to provide a safe and efficient pedestrian and bicycle network. d) Have a minimum 10m wide landscape corridor that includes a path of a suitable width to accommodate all likely users. 	<p>Figure 19</p> <p>Figure 19</p>

Locality	Assessment requirement	Reference
	<ul style="list-style-type: none"> e) Do not permit any vehicular access within or along the mid-block links. f) Development of the 'mid-block links' is endorsed by TCCS. 	
	<p>67. For the 'Sullivans Creek active travel connection' shown in Figure 19, the 'Sullivans Creek active travel connection' complies with all of the following:</p> <ul style="list-style-type: none"> a) 'Sullivans Creek active travel connection' is either in a location generally in accordance with Figure 19 or allows users of the Sullivans Creek pedestrian and cycle network who enter the estate from the south- west to transit through the area safely and efficiently towards a formal pedestrian and bicycle crossing point across Barton Highway to facilitate their journey north along Sullivans Creek. b) Aligns and connects with the community path system and internal pedestrian and bicycle network through the area. c) Provides unimpeded public pedestrian and bicycle access at all times for the length of the active travel connection shown in Figure 19. d) Exclusively utilises routes that are not also used by vehicles. e) Is a landscape corridor which is not less than 5m wide at the narrowest point and contains a shared path for pedestrians and cyclists; and the landscape corridor and path are of adequate width to meet the current and future usage demand. f) Demonstrate that there is adequate and suitable land for an 18-hole golf course to be provided within sections 64 and/or 67 Lyneham. 	Figure 19
	<p>68. The size and subdivision pattern of blocks demonstrates that a building with a high quality and interesting façade can be accommodated which addresses the following:</p> <ul style="list-style-type: none"> a) 'Open space areas', mid-block links' and 'internal pedestrian and bicycle network' b) 'External active travel connections' and block boundaries to Northbourne Avenue, Barton Highway, Sullivans Creek and the Swinden Street extension. 	
	<p>69. Dwellings provide a high quality, interesting façade by providing active or passive surveillance through the use of balconies, screened and unscreened windows and access stairs to address the following:</p> <ul style="list-style-type: none"> a) 'Open space areas', mid-block links' shown in Figure 19 and 'internal pedestrian and bicycle network'. b) Sullivans Creek active travel connection and block boundaries to Northbourne Avenue, Barton Highway, Sullivans Creek and the Swinden Street extension. 	
	<p>70. Where a building contains multiple dwellings that face the areas listed above, dwellings in a development predominately provide occasional surveillance rather than passive surveillance of those areas.</p>	
	<p>71. The height of building is:</p> <ul style="list-style-type: none"> a) Minimum height of building fronting Northbourne Avenue – 14.5m. 	

Locality	Assessment requirement	Reference
	<ul style="list-style-type: none"> b) Minimum number of storeys for a building fronting Sullivans Creek – 2. c) Maximum height of building – 18m. <p>For the above, height of building means the vertical distance between datum ground level at the front boundary to Northbourne Avenue and the highest point or points of the building. Where there is a culvert or other localised earthworks impacting the datum ground level of the front boundary to Northbourne Avenue the datum ground level is normalised five metres either side of a culvert or localised earthworks.</p>	
	<p>72. Generally, a smooth transition of building heights across the estate area is provided with:</p> <ul style="list-style-type: none"> a) Higher buildings predominately located in close proximity to the Swinden Street light rail stop and secondarily along Northbourne Avenue. b) Lower buildings predominantly located along Sullivans Creek. 	
	<p>73. For development other than that contained within the setback area to Sullivans Creek, the minimum setback from Sullivans Creek stormwater easement to development provides all of the following:</p> <ul style="list-style-type: none"> a) Adequate space for development. b) A minimum setback (whichever is greater): <ul style="list-style-type: none"> i) 6 metres; ii) as recommended by the TCCS endorsed flood risk study. 	
	<p>74. For multi-unit housing, dwellings numbers across the estate area comply with:</p> <ul style="list-style-type: none"> a) Minimum – 800 dwellings. b) Maximum – 1000 dwellings. 	
	<p>75. Total maximum gross floor area across the estate area for:</p> <ul style="list-style-type: none"> a) Supermarket – 350m² (this does not include). b) Takeaway food shop, restaurant and drink establishment – 550m². c) All non-retail commercial use – 2000m². 	
	<p>76. Development must demonstrate that a minimum gross floor area of 1500m² of community use has already and/or will be provided across the Yowani Estate area (including indicative location/s).</p>	
	<p>77. Where non-residential use occurs, it is to be located at ground floor level.</p>	
	<p>78. The minimum front boundary setback to Barton Highway and Swinden Street extension is 6m. The front boundary setback to Northbourne is in the National Capital Plan.</p>	
	<p>79. This applies to dwellings on the block and dwellings on adjoining blocks. Transfer of noise between noise sources and habitable rooms, particularly bedrooms, are minimised through the siting, design and layouts of buildings. For the purpose of this specification, noise sources include, but are not limited to, garage doors, driveways, service areas, plant rooms, building services, mechanical equipment, communal open space and circulation areas.</p>	
	<p>80. Vehicular access to individual development, including crossovers and driveways, are designed and constructed to</p>	

Locality	Assessment requirement	Reference
	<p>be co-located/shared with adjoining current or future development.</p> <p>81. Pedestrian and cyclist access to blocks are clearly separated from vehicular access and be distinguishable through surface materials, level changes, landscaping and/or slow-speed shared pedestrian road zones.</p> <p>82. Visitor car parking spaces are conveniently located for visitors to the development and are not allocated to any other purpose, including private spaces for dwellings or workers of the commercial components of the development.</p> <p>83. Adequate spaces and areas, suitably screened from public view, are provided for the loading and unloading of service vehicles.</p> <p>84. Vehicle parking is only permitted in a basement. On grade, podium or other above ground parking is only permitted where the following is met:</p> <p>a) The parking area is located away from the Federal Highway and the Swinden Street extension and is suitably screened through use of buildings, communal open space area, private open space and/or landscaping.</p>	
O'Connor	<p>85. On Block 1 Section 66 multi-unit development undertaken by the Demonstration Housing Project lessee(s) identified on a register published on an ACT Government website complies with the following:</p> <p>a) Does not exceed 3 dwellings.</p> <p>b) Subdivision under the <i>Unit Titles Act 2001</i> is permitted.</p>	Block 1 Section 66
Turner	<p>86. On Sections 24, 35 and 45, development complies with the following:</p> <p>a) Continuous building facades do not occupy more than two blocks.</p> <p>b) The maximum plot ratio does not exceed 100%, unless the building's bulk and scale suits the character of the area and provides reasonable solar access to dwellings and private open space on adjoining residential blocks.</p> <p>c) The minimum setback to Barry Drive and Moore Street is 10m, unless setbacks are compatible with existing adjacent development and minimise detrimental impacts, including overshadowing and excessive scale.</p> <p>d) Front and side setbacks to sections 35 and 45 are consistent with existing adjacent development. The encroachment of basement car parking into the front landscape zone may be considered.</p> <p>e) Turner Section 24 has no vehicular access to or from Barry Drive.</p>	Sections 24, 35, 45
Watson	<p>87. In accordance with Figure 20, on Section 76 the design of the built form will contribute to all the following:</p> <p>a) Existing context and character of the local area, including density and scale.</p> <p>b) Existing landscape character, setting and ecological values.</p> <p>c) Sustainability and resilience for a changing climate.</p>	Figure 20

Locality	Assessment requirement	Reference
	<ul style="list-style-type: none"> d) Connectivity, legibility and safety of the area including passive surveillance onto public spaces. e) Diversity and amenity of public spaces that promote community life; and will not negatively impact surrounding neighbours. f) Connection of the public and shared path for pedestrians and cyclists consistent with Figure 20. g) Public paths are to incorporate lighting for public safety, seating along main paths and shade trees and soft landscaping. h) A public road consistent with Figure 20. i) Urban open space is to provide a public local neighbourhood park of a least one hectare in the south-east corner consistent with Figure 20. j) Retain the western, eastern, and southern portions of the site for wildlife habitat, improved amenity and reduction on urban heat. k) The recommendation of the cultural heritage report provided by EPSDD are reflected in any Subdivision Design Application. l) A site will be reserved for the demonstration housing process within the area identified as AD3 in Figure 7. 	Figure 20
	88. Where development includes fencing that face public footpaths, communal spaces and/or public open space, the fencing incorporate high-quality materials that are semi-transparent, direct access from private dwellings, such as providing gates, and landscaping in front of the fencing.	
	89. This applies to the area shown in Figure 21 for Section 76 Watson. An environmental assessment must accompany any Development Application for development. Alternatively written advice from the Environmental Protection Authority that the site has been assessed for contamination to its satisfaction can be provided.	Figure 21
	90. This applies to the area shown in Figure 22 for Section 76 Watson.	
	<ul style="list-style-type: none"> a) For area A: the lesser of 2 storeys and 8.5 metres. b) For area B: the lesser of 4 storeys and 16.5 metres. 	Figure 22
Northbourne Avenue	<ul style="list-style-type: none"> 91. Development must be consistent will all requirements of the National Capital Plan. 92. Storage units and plant equipment (including air-conditioning) are not located on balconies. 93. In accordance with Figure 23, for Area A building separation distances are contained within the National Capital Plan. 94. In accordance with Figure 23, building heights are: <ul style="list-style-type: none"> a) For Area A – minimum 20m and maximum 25m. The maximum can be increased to 27.5m where the building includes an apartment which is at least partially or wholly two storeys high, and the apartment includes at least two storeys that are above finished ground. b) For Area B – minimum 14.5m and maximum 18m. The maximum can be increased to 25m where development provides an adequate transition in building height from the building to the adjacent residential zone and 	Figure 23

Locality	Assessment requirement	Reference
	maintains reasonable amenity for residents of the adjacent residential zone.	
	c) For 'Dickson node' – minimum 25.5m and maximum 32m.	
	d) For 'Macarthur Node' – minimum is not less than 80% of the maximum building height for each site as described in the National Capital Plan. The maximum height of building is as described in the National Capital Plan.	
95.	Buildings are set back in accordance with Figure 24.	
96.	In accordance with Figure 23:	Figure 24 Figure 23
	a) Buildings fronting Northbourne Avenue, Macarthur Avenue, Wakefield Avenue and Antill Street incorporate uses on the ground floor that generate activity in the public space, in a form that is with the needs of the area.	
	b) On the frontage of Northbourne Avenue, Wakefield Avenue, Antill Street or Mouat Street residential use is not achieved, buildings have ground floor uses that generate activity in the public space, direct pedestrian access is provided at street level, buildings avoid extensive lengths of blank walls.	
	c) Where not on the frontage of Northbourne Avenue, Wakefield Avenue, Antill Street or Mouat Street, residential use at the ground floor complies with AS4299 – Adaptable housing and is adaptable for commercial uses.	
	d) Where a lawfully constructed building exceeds the building height permitted by this policy, a new building up to the height of the existing building may be permitted provided there are no additional adverse impacts on adjoining properties.	
	e) Developments containing 40 or more dwellings provide a variety of dwelling sizes. Generally, development is to contain not more than 40% studio or one-bedroom dwellings, not more than 40% two-bedroom dwellings, not less than 20% three- or more bedroom dwellings.	
	f) Deep soil zones are provided for landscaping that generally have a minimum horizontal dimension of 5m, incorporate any protected trees, allow for the development of healthy root systems and provide anchorage and stability for mature trees and are co-located near deep soil zones on adjacent blocks where possible.	
	g) Awnings, canopies, or colonnades are provided that provide weather protection to pedestrians along buildings and at building entrances and are integrated with the design of the building.	
97.	Buildings with three or more storeys do not reduce direct sunlight between 9am–4pm to any habitable room in any adjoining residential or commercial accommodation development to less than 2 hours, unless demonstrated that daytime living areas have reasonable access to sunlight.	
98.	The transfer of noise between noise sources and habitable rooms, particularly bedrooms, is minimised through the siting, design and layouts of buildings.	

Locality	Assessment requirement	Reference
	<p>99. Vehicular access arrangements ensure pedestrian and bicycle priority and desire lines and paths are maximised, and the works contain high quality public realm treatments that add visual interest, including tree planting, landscaping, materials, footpaths and lighting. Pedestrian and cyclist access to blocks must be clearly separated from vehicular access and be distinguishable through surface materials, level changes and landscaping.</p> <p>100. Vehicle parking is only permitted in a basement. At-grade, podium or other above ground vehicle parking is not permitted, unless screened by buildings or landscape. If podium parking is provided it must be behind spaces such as apartments or hotel rooms. Screened parking structures are not acceptable.</p>	
Inner North precinct	<p>101. In accordance with Figure 25, development in the Inner North precinct complies with the following:</p> <p>a) Design promotes perimeter block development by building primarily across the site frontage (and not down the length of the site) to:</p> <ul style="list-style-type: none"> i) provide space to the rear of the block to retain or introduce large-canopy trees and create a treed backdrop to development. ii) maximise street address as well as physical and visual access to the rear garden. iii) minimise privacy impacts between adjacent sites iv) optimise possibilities for private and communal open spaces. <p>b) Dual frontage design (Figure 26) is required for development on blocks specified in the control plans (Figures 27-31). Where dual frontage design is required, development should:</p> <ul style="list-style-type: none"> i) maximise building frontage to both the main street address from the primary building zone and frontage to public space or secondary street frontage from the secondary building zone. ii) provide and maximise overlooking and prospect into open spaces including pedestrian laneways from living areas within dwellings of the development. iii) promote the increased use (including walking and cycling) of open space by providing access to and overlooking of open spaces. <p>102. Maximum site coverage of up to 100% in the Primary Building Zone may be permitted subject to the agreement of adjoining lessees and lodging a plan for integrated development. This requirement applies to all built-to-boundary proposals less than 100% site coverage in the Primary Building Zone.</p>	<p>Figure 25</p> <p>Figure 26</p> <p>Figures 27-31</p>
