About this republication

The republished law

This is a republication of the *Road Transport (Road Rules) Regulation 2017*, made under the *Road Transport (Safety and Traffic Management) Act 1999* (including any amendment made under the *Legislation Act 2001*, part 11.3 (Editorial changes)) as in force on 30 April 2018. It also includes any commencement, amendment, repeal or expiry affecting this republished law to 30 April 2018.

The legislation history and amendment history of the republished law are set out in endnotes 3 and 4.

Kinds of republications

The Parliamentary Counsel's Office prepares 2 kinds of republications of ACT laws (see the ACT legislation register at www.legislation.act.gov.au):

- authorised republications to which the *Legislation Act 2001* applies
- unauthorised republications.

The status of this republication appears on the bottom of each page.

Editorial changes

The *Legislation Act 2001*, part 11.3 authorises the Parliamentary Counsel to make editorial amendments and other changes of a formal nature when preparing a law for republication. Editorial changes do not change the effect of the law, but have effect as if they had been made by an Act commencing on the republication date (see *Legislation Act 2001*, s 115 and s 117). The changes are made if the Parliamentary Counsel considers they are desirable to bring the law into line, or more closely into line, with current legislative drafting practice.

This republication does not include amendments made under part 11.3 (see endnote 1).

Uncommenced provisions and amendments

If a provision of the republished law has not commenced, the symbol **U** appears immediately before the provision heading. Any uncommenced amendments that affect this republished law are accessible on the ACT legislation register (www.legislation.act.gov.au). For more information, see the home page for this law on the register.

Modifications

If a provision of the republished law is affected by a current modification, the symbol **M** appears immediately before the provision heading. The text of the modifying provision appears in the endnotes. For the legal status of modifications, see the *Legislation Act 2001*, section 95.

Penalties

At the republication date, the value of a penalty unit for an offence against this law is \$150 for an individual and \$750 for a corporation (see *Legislation Act 2001*, s 133).

Road Transport (Road Rules) Regulation 2017

made under the

Road Transport (Safety and Traffic Management) Act 1999

Part 1 Preliminary

1 Name of regulation

This regulation is the *Road Transport (Road Rules) Regulation 2017*.

3 Dictionary

The dictionary at the end of this regulation is part of this regulation.

Note 1 The dictionary at the end of this regulation defines certain terms used in this regulation, and includes references (*signpost definitions*) to other terms defined elsewhere in this regulation.

For example, the signpost definition '*parking permit*—see the *Road Transport (Safety and Traffic Management) Regulation 2017*, dictionary.' means that the term 'parking permit' is defined in that dictionary and the definition applies to this regulation.

Note 2 A definition in the dictionary (including a signpost definition) applies to the entire regulation unless the definition, or another provision of the regulation, provides otherwise or the contrary intention otherwise appears (see [Legislation Act](#), s 155 and s 156 (1)).

4 Diagrams

A diagram in this regulation is part of this regulation.

5 Examples

An example in this regulation is part of this regulation.

Note An example is not exhaustive and may extend, but does not limit, the meaning of the provision in which it appears (see [Legislation Act](#), s 126 and s 132).

6 Notes

A note in this regulation is explanatory and is not part of this regulation.

Note See the [Legislation Act](#), s 127 (1), (4) and (5) for the legal status of notes.

7 Offences against regulation—application of Criminal Code etc

Other legislation applies in relation to offences against this regulation.

Note 1 *Criminal Code*

The [Criminal Code](#), ch 2 applies to all offences against this regulation (see Code, pt 2.1).

The chapter sets out the general principles of criminal responsibility (including burdens of proof and general defences), and defines terms used for offences to which the Code applies (eg *conduct*, *intention*, *recklessness* and *strict liability*).

Note 2 *Penalty units*

The [Legislation Act](#), s 133 deals with the meaning of offence penalties that are expressed in penalty units.

8 Offences against regulation—strict liability

An offence against this regulation is a strict liability offence.

9 Offences against regulation—defence

It is a defence to an offence against this regulation if the defendant proves that the offence—

- (a) was the result of an accident; or
- (b) could not have been avoided by any reasonable efforts by the defendant.

10 Objects of regulation

The objects of this regulation are to—

- (a) provide rules for all road users in the ACT that are substantially uniform with rules for road users elsewhere in Australia; and

Part 3 Speed limits

20 Obeying speed limit

A driver must not drive at a speed over the speed limit applying to the driver for the length of road where the driver is driving.

Maximum penalty: 20 penalty units.

21 Speed limit where speed limit sign applies

- (1) The speed limit applying to a driver for a length of road to which a speed limit sign applies is the number of kilometres per hour indicated by the number on the sign.
- (2) However, if the number on the speed limit sign is over 100 and the driver is driving a bus with a GVM over 5t, or another vehicle with a GVM over 12t, the speed limit applying to the driver for the length of road is 100km/h.
- (3) A speed limit sign on a road applies to the length of road beginning at the sign and ending at the nearest of the following:
 - (a) a speed limit sign on the road with a different number on the sign;
 - (b) an end speed limit sign or speed derestriction sign on the road;
 - (c) if the road ends at a T-intersection or dead end—the end of the road.

22 Speed limit in speed limited area

- (1) The speed limit applying to a driver for any length of road in a speed limited area is the number of kilometres per hour indicated by the number on the area speed limit sign on a road into the area, unless another speed limit applies to the driver for the length of road under another provision of this part.

Example—another speed limit

Although an area speed limit sign on a road into a speed limited area may indicate a speed limit of 60km/h, a particular length of road in the area may have a school zone sign indicating a 40km/h speed limit for that length of road.

- (2) In this regulation:

speed limited area is the network of roads in an area with—

- (a) an area speed limit sign on each road into the area, indicating the same number; and
- (b) an end area speed limit sign on each road out of the area.

- (3) In subsection (2):

road does not include a road related area.

23 Speed limit in school zone

- (1) The speed limit applying to a driver for any length of road in a school zone is the number of kilometres per hour indicated by the number on the school zone sign on a road, or the road, into the zone.

- (2) In this regulation:

school zone means—

- (a) if there is a school zone sign and an end school zone sign, or a speed limit sign with a different number on the sign, on a road and there is no intersection on the length of road between the signs—that length of road; or

- (b) if there is a school zone sign on a road that ends in a dead end and there is no intersection, nor a sign mentioned in paragraph (a), on the length of road beginning at the sign and ending at the dead end—that length of road; or
 - (c) in any other case—the network of roads in an area with—
 - (i) a school zone sign on each road into the area, indicating the same number; and
 - (ii) an end school zone sign, or a speed limit sign indicating a different number, on each road out of the area.
- (3) In subsection (2) (c):
road does not include a road related area.

24 Speed limit in shared zone

- (1) The speed limit applying to a driver for any length of road in a shared zone is the number of kilometres per hour indicated by the number on the shared zone sign on a road, or the road into the zone.
- (2) In this regulation:
shared zone means—
 - (a) if there is a shared zone sign and an end shared zone sign on a road and there is no intersection on the length of road between the signs—that length of road; or
 - (b) if there is a shared zone sign on a road that ends in a dead end and there is no intersection on the length of road beginning at the sign and ending at the dead end—that length of road; or

- (c) a network of roads in an area with—
 - (i) a shared zone sign on each road into the area, indicating the same number; and
 - (ii) an end shared zone sign on each road out of the area; or
 - (d) a road related area that is between a shared zone sign that relates to the area and an end shared zone sign that relates to the area.
- (3) In subsection (2) (c):
road does not include a road related area.

25 Speed limit elsewhere

- (1) If a speed limit sign does not apply to a length of road and the length of road is not in a speed limited area, school zone or shared zone, the speed limit applying to a driver for the length of road is the default speed limit.
- (2) The *default speed limit* applying to a driver for a length of road in a built-up area is 50km/h.
- (3) The *default speed limit* applying to a driver for any other length of road is 100km/h.

Part 4 Making turns

Division 4.1 Left turns

26 Application—div 4.1—roundabouts, road related areas and adjacent land

- (1) This division does not apply to a driver entering or leaving a roundabout.
- (2) This division applies to a driver turning left from a road into a road related area or adjacent land, or from a road related area into a road, as if the driver were turning left at an intersection.
- (3) In this section:
road does not include a road related area.

27 Starting left turn from road (except multi-lane road)

- (1) A driver turning left at an intersection from a road (except a multi-lane road) must approach and enter the intersection from as near as practicable to the far left side of the road.
Maximum penalty: 20 penalty units.
- (1A) Subsection (1) also applies to the rider of a bicycle who approaches and enters an intersection from a bicycle storage area.
- (1B) Despite subsection (1), if there is space in a bicycle storage area for 2 riders of bicycles to be next to each other, the rider on the right may approach and enter the intersection as near as practicable to the right side of the other rider, but only if that other rider approaches and enters the intersection in accordance with this section.

- (2) In this section:

road does not include a road related area.

Example

Starting a left turn from a road (except a multi-lane road)

28 Starting left turn from multi-lane road

- (1) A driver turning left at an intersection from a multi-lane road must approach and enter the intersection from within the left lane unless—
- (a) the driver is required or permitted to approach and enter the intersection from within another marked lane under—
 - (i) section 88 (1) (Left turn sign); or
 - (ii) section 92 (Traffic lane arrows); or
 - (iii) section 159 (Marked lane required to be used by particular kind of vehicle); or
 - (b) the driver is turning, at B lights or traffic arrows, in accordance with division 17.2 (Public buses); or

(c) subsection (1A) or (2) applies to the driver.

Maximum penalty: 20 penalty units.

Example—s (1) (a)

Starting a left turn on a multi-lane road with traffic lane arrows as required or permitted under s 92

(1A) A driver turning left at an intersection from a multi-lane road that has a slip lane must approach and enter the intersection—

- (a) from within the slip lane; or
- (b) if there is an obstruction that prevents the driver from entering the intersection from within the slip lane—from within the left lane.

Maximum penalty: 20 penalty units.

- (2) A driver may approach and enter the intersection from the marked lane next to the left lane as well as, or instead of, the left lane if—
- (a) the driver's vehicle, together with any load or projection, is 7.5m long, or longer; and
 - (b) the vehicle displays a do not overtake turning vehicle sign; and
 - (c) any part of the vehicle is within 50m of the nearest point of the intersection; and
 - (d) it is not practicable for the driver to turn left from within the left lane; and
 - (e) the driver can safely occupy the next marked lane and can safely turn left at the intersection by occupying the next marked lane, or both lanes.

Example

Long vehicle turning left from the left lane and next marked lane

- (2A) If there is a bicycle storage area before an intersection that extends across 1 or more marked lanes of a multi-lane road, the rider of a bicycle turning left must approach and enter the intersection from within the part of the bicycle storage area that is directly in front of the left marked lane or of a bicycle lane that is on the left side of the road.

Maximum penalty: 20 penalty units.

- (3) In this section:

left lane means—

- (a) the marked lane nearest to the far left side of the road; or
- (b) if there is an obstruction (for example, a parked car or roadworks) in that marked lane—the marked lane nearest to that marked lane that is not obstructed.

marked lane, for a driver, does not include a special purpose lane in which the driver is not permitted to drive.

29 Making left turn as indicated by turn line

- (1) If a driver is turning left at an intersection and there is a turn line indicating how the turn is required to be made, the driver must make the turn as indicated by the turn line unless—
- (a) the driver is turning, at B lights or traffic arrows, in accordance with division 17.2 (Public buses); or

(b) subsection (2) applies to the driver.

Maximum penalty: 20 penalty units.

Example

Making a left turn as indicated by a turn line

- (2) A driver may turn left at an intersection other than as indicated by a turn line if—
- (a) the driver's vehicle, together with any load or projection, is 7.5m long, or longer; and
 - (b) the vehicle displays a do not overtake turning vehicle sign; and
 - (c) it is not practicable for the driver to turn left as indicated by the turn line; and
 - (d) the driver can safely turn left other than as indicated by the turn line.

Division 4.2 Right turns

30 Application—div 4.2—certain right turns

- (1) This division does not apply to—

31 Starting right turn from road (except multi-lane road)

- (1) A driver turning right at an intersection from a road (except a multi-lane road) must approach and enter the intersection in accordance with this section.
Maximum penalty: 20 penalty units.
- (2) If the road has a dividing line or median strip, the driver must approach and enter the intersection from the left of, parallel to, and as near as practicable to, the dividing line or median strip.
- (3) If the road does not have a dividing line or median strip and is not a one-way road, the driver must approach and enter the intersection from the left of, parallel to, and as near as practicable to, the centre of the road.

- (4) If the road is a one-way road, the driver must approach and enter the intersection from as near as practicable to the far right side of the road.
- (4A) Subsections (2) to (4) also apply to the rider of a bicycle who approaches and enters an intersection from a bicycle storage area.
- (4B) Despite subsections (2) to (4), if there is space in a bicycle storage area for 2 riders of bicycles to be next to each other, the rider on the left may approach and enter the intersection as near as practicable to the left side of the other rider, but only if that other rider approaches and enters the intersection in accordance with this section.
- (5) In this section:

road does not include a road related area.

Example 1

Starting a right turn from a road with a dividing line

Example 2

Starting a right turn from a one-way road

32 Starting right turn from multi-lane road

- (1) A driver turning right at an intersection from a multi-lane road must approach and enter the intersection from within the right lane unless—

(c) subsection (2) applies to the driver.

Maximum penalty: 20 penalty units.

Example—s (1) (a)

Starting a right turn on a multi-lane road with traffic lane arrows as required or permitted under s 92

- (2) A driver may approach and enter the intersection from the marked lane next to the right lane as well as, or instead of, the right lane if—
- (a) the driver's vehicle, together with any load or projection, is 7.5m long, or longer; and
 - (b) the vehicle displays a do not overtake turning vehicle sign; and
 - (c) any part of the vehicle is within 50m of the nearest point of the intersection; and
 - (d) it is not practicable for the driver to turn right from within the right lane; and
 - (e) the driver can safely occupy the next marked lane and can safely turn right at the intersection by occupying the next marked lane, or both lanes.

- (2A) If there is a bicycle storage area before an intersection that extends across 1 or more marked lanes of a multi-lane road, the rider of a bicycle turning right (but not making a hook turn) must approach and enter the intersection from within the part of the bicycle storage area that is directly in front of the right marked lane or of a bicycle lane that is on the right side of the road.

- (a) passes as near as practicable to the right of the centre of the intersection; and
 - (b) turns into the left of the centre of the road the driver is entering, unless the driver is entering a one-way road.

Example 1

Making a right turn as indicated by turn lines

Example 2

Making a right turn from a road with no turn lines indicating how to make the turn

Division 4.3 Hook turns at intersections

34 Making hook turn at hook turn only sign

- (1) A driver turning right at an intersection with traffic lights and a hook turn only sign must turn right by making a hook turn in accordance with this section.

Maximum penalty: 20 penalty units.

- (2) To make a **hook turn**, the driver must take, in sequence, each of the following steps:
- 1 Approach and enter the intersection from as near as practicable to the far left side of the road that the driver is leaving.
 - 2 Move forward, keeping as near as practicable to the left of the intersection and clear of any marked foot crossing, until the driver is as near as practicable to the far side of the road that the driver is entering.
 - 3 Remain at the position reached under step 2 until the traffic lights on the road that the driver is entering change to green.
 - 4 Turn right into that road.

- (3) In this section:

road does not include a road related area.

Example

Making a hook turn at a hook turn only sign

35 Optional hook turn by bicycle rider

- (1) The rider of a bicycle turning right at an intersection without a hook turn only sign, or a no hook turn by bicycles sign, may turn right at the intersection by making a right turn under division 4.2 (Right turns) or a hook turn under this section.
- (2) The rider must make a hook turn under this section in accordance with subsection (3).

Maximum penalty: 20 penalty units.

- (3) To make a **hook turn** under this section, the rider must take, in sequence, each of the following steps:

- 1 Approach and enter the intersection from as near as practicable to the far left side of the road that the rider is leaving.
- 2 Move forward—
 - (a) keeping as near as practicable to the far left side of the intersection; and
 - (b) keeping clear of any marked foot crossing; and
 - (c) keeping clear, as far as practicable, of any driver turning left from the left of the intersection;

until the rider is as near as practicable to the far side of the road that the rider is entering.

- 3 If there are traffic lights at the intersection, remain at the position reached under step 2 until the traffic lights on the road that the rider is entering change to green.
- 4 If there are no traffic lights at the intersection, remain at the position reached under step 2 until the rider has given way to approaching drivers on the road that the rider is leaving.
- 5 Turn right into the road that the rider is entering.

- (4) To make a **hook turn** under this section at an intersection that has a bicycle hook turn storage area on the left side of the intersection as the rider approaches the intersection, the rider must take the following initial 2 steps instead of the initial 2 steps listed in subsection (3):
- 1 Approach the intersection from the far left side of the road the rider is leaving and enter the intersection by moving into the bicycle hook turn storage area, keeping clear of any marked foot crossing.
 - 2 Move forward in the bicycle hook turn storage area until the rider is as near as practicable to the far side of the road that the rider is entering.

Example 1

Bicycle rider making a hook turn at an intersection without traffic lights where there is a bicycle hook turn storage area

Example 2

Bicycle rider making a hook turn at an intersection without traffic lights

36 Bicycle rider making hook turn contrary to no hook turn by bicycles sign

The rider of a bicycle must not make a hook turn at an intersection that has a no hook turn by bicycles sign.

Maximum penalty: 20 penalty units.

Division 4.4 U-turns

37 Beginning U-turn

A driver must not begin a U-turn unless—

Maximum penalty: 20 penalty units.

- (2) A driver must not make a U-turn on a length of road to which a no U-turn sign applies.

Maximum penalty: 20 penalty units.

- (3) A no U-turn sign on a road (except a no U-turn sign at an intersection or at a break in a dividing strip) applies to the length of road beginning at the sign and ending at the nearer of the following:

- (a) the next intersection on the road;
- (b) if the road ends at a T-intersection or dead end—the end of the road.

40 Making U-turn at intersection with traffic lights

A driver must not make a U-turn at an intersection with traffic lights unless there is a U-turn permitted sign at the intersection.

Maximum penalty: 20 penalty units.

41 Making U-turn at intersection without traffic lights

A driver must not make a U-turn at an intersection without traffic lights if there is a no U-turn sign at the intersection.

Maximum penalty: 20 penalty units.

42 Starting U-turn at intersection

A driver making a U-turn at an intersection must start the U-turn—

- (a) if the road where the driver is turning has a dividing line or median strip—from the marked lane nearest, or as near as practicable, to the dividing line or median strip; or

46 Giving left change of direction signal

- (1) Before a driver changes direction to the left, the driver must give a left change of direction signal in accordance with section 47 for long enough to comply with subsection (2) and, if subsection (3) applies to the driver, that subsection.

Maximum penalty: 20 penalty units.

- (2) The driver must give the change of direction signal for long enough to give sufficient warning to other drivers and pedestrians.
- (3) If the driver is about to change direction by moving from a stationary position at the side of the road or in a median strip parking area, the driver must give the change of direction signal for at least 5 seconds before the driver changes direction.
- (4) The driver must stop giving the change of direction signal as soon as the driver completes the change of direction.

49 How to give right change of direction signal

- (1) The driver of a vehicle must give a right change of direction signal by operating the vehicle's right direction indicator lights.
- (2) However, if the vehicle's direction indicator lights are not in working order or are not clearly visible, or the vehicle is not fitted with direction indicator lights, the driver must give the change of direction signal by giving a hand signal in accordance with section 50, or using a mechanical signalling device fitted to the vehicle.

50 How to give right change of direction signal by giving hand signal

To give a hand signal for changing direction to the right, the driver must extend the right arm and hand horizontally and at right angles from the right side of the vehicle, with the hand open and the palm facing the direction of travel.

Example

Giving a hand signal for changing direction to the right

51 When use of direction indicator lights permitted

The driver of a vehicle must not operate a direction indicator light except—

- (a) to give a change of direction signal when the driver is required to give the signal under this regulation; or

- (2) However, if the vehicle's brake lights are not in working order or are not clearly visible, or the vehicle is not fitted with brake lights, the driver must give the stop signal by giving a hand signal in accordance with section 55, or using a mechanical signalling device fitted to the vehicle.

55 How to give stop signal by giving hand signal

- (1) To give a hand signal for stopping or suddenly slowing, the driver must extend the right arm and hand at right angles from the right side of the vehicle, with the upper arm horizontal and the forearm and hand pointing upwards, and with the hand open and the palm facing the direction of travel.
- (2) However, the rider of a motorbike may give the hand signal by extending the left arm and hand at right angles from the left side of the motorbike, with the upper arm horizontal and the forearm and hand pointing upwards, and with the hand open and the palm facing the direction of travel.

Part 6 Traffic lights, traffic arrows and twin red lights

Division 6.1 Obeying traffic lights and traffic arrows

56 Stopping for red traffic light or arrow

- (1) A driver approaching or at traffic lights showing a red traffic light must stop—
 - (a) if there is a stop line at or near the traffic lights—as near as practicable to, but before reaching, the stop line; or
 - (b) if there is a stop here on red signal sign at or near the traffic lights, but no stop line—as near as practicable to, but before reaching, the sign; or
 - (c) if there is no stop line or stop here on red signal sign at or near the traffic lights—as near as practicable to, but before reaching, the nearest or only traffic lights;

and must not proceed past the stop line, stop here on red signal sign or nearest or only traffic lights until the traffic lights show a green or flashing yellow traffic light or no traffic light.

Maximum penalty: 20 penalty units.

Example—s (1) (b)

Stopping at a stop here on red signal sign on a road the driver is entering

In this example the driver may go straight ahead, or turn right or left, if there is a green traffic light showing at 1. However, the driver must not go beyond the stop here on red signal sign at 2 if there is a red traffic light showing on the road the driver is entering (see 2 and 3).

- (1A) However, if the traffic lights are at an intersection with a left turn on red after stopping sign and the driver is turning left at the intersection, the driver may turn left after stopping.
- (2) A driver approaching or at traffic arrows showing a red traffic arrow who is turning in the direction indicated by the arrow must stop—
 - (a) if there is a stop line at or near the traffic arrows—as near as practicable to, but before reaching, the stop line; or
 - (b) if there is a stop here on red arrow sign at or near the traffic arrows, but no stop line—as near as practicable to, but before reaching, the sign; or

- (c) if there is no stop line or stop here on red arrow sign at or near the traffic arrows—as near as practicable to, but before reaching, the nearest or only traffic arrows;

and must not proceed past the stop line, stop here on red arrow sign or nearest or only traffic arrows until the traffic arrows show a green or flashing yellow traffic arrow or no traffic arrow.

Maximum penalty: 20 penalty units.

- (3) If there is a bicycle storage area before any traffic lights referred to in subsection (1) or (2), a reference to the stop line in subsection (1) (a) or (2) (a)—
 - (a) in the case of the driver of a motor vehicle—is a reference to the first stop line that the driver comes, or came, to in approaching the lights; or
 - (b) in the case of the rider of a bicycle—is a reference to the stop line that is nearest to the intersection.

57 Stopping for yellow traffic light or arrow

- (1) A driver approaching or at traffic lights showing a yellow traffic light must stop—
 - (a) if there is a stop line at or near the traffic lights and the driver can stop safely before reaching the stop line—as near as practicable to, but before reaching, the stop line; or
 - (b) if there is no stop line at or near the traffic lights and the driver can stop safely before reaching the traffic lights—as near as practicable to, but before reaching, the nearest or only traffic lights; or

- (c) if the traffic lights are at an intersection and the driver cannot stop safely in accordance with paragraph (a) or (b), but can stop safely before entering the intersection—before entering the intersection;

and must not proceed past the stop line or nearest or only traffic lights, or into the intersection, until the traffic lights show a green or flashing yellow traffic light or no traffic light.

Maximum penalty: 20 penalty units.

- (2) A driver approaching or at traffic arrows showing a yellow traffic arrow who is turning in the direction indicated by the arrow must stop—
 - (a) if there is a stop line at or near the traffic arrows and the driver can stop safely before reaching the stop line—as near as practicable to, but before reaching, the stop line; or
 - (b) if there is no stop line at or near the traffic arrows and the driver can stop safely before reaching the traffic arrows—as near as practicable to, but before reaching, the nearest or only traffic arrows; or
 - (c) if the traffic arrows are at an intersection and the driver cannot stop safely in accordance with paragraph (a) or (b), but can stop safely before entering the intersection—before entering the intersection;

and must not proceed past the stop line or nearest or only traffic arrows, or into the intersection, until the traffic arrows show a green or flashing yellow traffic arrow or no traffic arrow.

Maximum penalty: 20 penalty units.

- (3) If the traffic lights or traffic arrows are at an intersection and the driver is not able to stop safely under subsection (1) or (2) and enters the intersection, the driver must leave the intersection as soon as the driver can do so safely.

Maximum penalty: 20 penalty units.

- (4) If there is a bicycle storage area before any traffic lights referred to in subsection (1) or (2), a reference to the stop line in subsection (1) (a) or (2) (a)—
- (a) in the case of the driver of a motor vehicle—is a reference to the first stop line that the driver comes, or came, to in approaching the lights;
 - (b) in the case of the rider of a bicycle—is a reference to the stop line that is nearest to the intersection.

58 Exceptions to stopping for red or yellow traffic light

- (1) A driver approaching or at traffic lights showing a red traffic light or yellow traffic light does not have to stop if a green traffic arrow is also showing and the driver is turning in the direction indicated by the arrow.
- (2) A driver turning at an intersection with traffic lights who approaches or is at a red traffic light on the road that the driver is entering does not have to stop for that traffic light if there is no stop line or stop here on red signal sign at or near the traffic light.

59 Proceeding through red traffic light

- (1) If traffic lights at an intersection or marked foot crossing are showing a red traffic light, a driver must not enter the intersection or marked foot crossing.

Maximum penalty: 20 penalty units.

- (2) However, if the traffic lights are at an intersection with a left turn on red after stopping sign and the driver is turning left at the intersection, the driver may turn left after stopping.
- (3) Also, subsection (1) does not apply to a driver if section 58 (1) applies to the driver.

60 Proceeding through red traffic arrow

If traffic arrows at an intersection or marked foot crossing are showing a red traffic arrow, and a driver is turning in the direction indicated by the arrow, the driver must not enter the intersection or marked foot crossing.

Maximum penalty: 20 penalty units.

60A Proceeding through bicycle storage area before red traffic light or arrow

- (1) If there is a bicycle storage area before traffic lights that are showing a red traffic light, the driver of a motor vehicle must not allow any part of the vehicle to enter the bicycle storage area.

Maximum penalty: 20 penalty units.

- (2) If there is a bicycle storage area before traffic arrows that are showing a red traffic arrow, and the driver of a motor vehicle is turning in the direction indicated by the arrow, the driver must not allow any part of the vehicle to enter the bicycle storage area.

Maximum penalty: 20 penalty units.

61 Proceeding when traffic light or arrow at intersection changes to yellow or red

- (1) This section applies to—
- (a) a driver at an intersection with traffic lights showing a green traffic light who has stopped after the stop line, stop here on red signal sign, or nearest or only traffic lights, at the intersection and is not making a hook turn at the intersection; or
 - (b) a driver at an intersection with traffic arrows showing a green traffic arrow who is turning in the direction indicated by the arrow and has stopped after the stop line, stop here on red arrow sign, or nearest or only traffic arrows, at the intersection.

Example

A driver may stop after the stop line at an intersection with traffic lights showing a green traffic light, and not proceed through the intersection, because traffic is congested.

- (2) If the traffic lights or traffic arrows change to yellow or red while the driver is stopped and the driver has not entered the intersection, the driver must not enter the intersection.

Maximum penalty: 20 penalty units.

- (3) However, if the traffic lights are at an intersection with a left turn on red after stopping sign and the driver is turning left at the intersection, the driver may turn left after stopping.

- (4) Also, subsection (2) does not apply to a driver if section 58 (1) applies to the driver.

- (5) If the traffic lights or traffic arrows change to yellow or red while the driver is stopped and the driver has entered the intersection, the driver must leave the intersection as soon as the driver can do so safely.

Maximum penalty: 20 penalty units.

Maximum penalty: 20 penalty units.

Examples—par (e)

The crossing, or a road beyond the crossing, may be blocked by congested traffic, a disabled vehicle, a collision between vehicles or between a vehicle and a pedestrian, or by stock on the road.

Part 20 **Traffic control devices and traffic-related items**

Division 20.1 **General**

314 **Diagram of traffic control device, traffic-related item or symbol**

- (1) A diagram in this regulation of a traffic control device, traffic-related item, or symbol, represents a likeness of the device, item or symbol.
- (2) If there are 2 or more diagrams of a traffic sign in schedule 2 (Standard or commonly used traffic signs) or schedule 3 (Other permitted traffic signs), or of a traffic-related item or symbol in schedule 4 (Symbols and traffic-related items), each diagram represents a likeness of a permitted version of the sign, item or symbol.
- (3) If a diagram of a traffic sign in schedule 2 or schedule 3, or of a traffic-related item or symbol in schedule 4, is in black and white, the permitted version of the sign, item or symbol is in black and white only.

315 **Legal effect of traffic control device**

- (1) A traffic control device of a kind mentioned in this regulation has effect for this regulation if—
 - (a) the device is on a road; and
 - (b) the device complies substantially with this regulation.
- (2) A traffic control device is taken to comply substantially with this regulation unless the contrary is proved.

316 When traffic control device complies substantially with regulation

- (1) A traffic sign complies substantially with this regulation if—
 - (a) it is a reasonable likeness of a diagram in schedule 2 (Standard or commonly used traffic signs) or schedule 3 (Other permitted traffic signs) of that kind of traffic sign; or
 - (b) for a traffic sign of a kind for which there is not a diagram in schedule 2 or schedule 3—it complies substantially with a description of that kind of traffic sign in this regulation and, if the description includes a symbol for which there is a diagram in schedule 4, the symbol on the sign is a reasonable likeness of the diagram.
- (2) A road marking complies substantially with this regulation if it complies substantially with a description of that kind of road marking in this regulation and, if the description includes a symbol for which there is a diagram in schedule 4 (Symbols and traffic-related items), the symbol in the road marking is a reasonable likeness of the diagram.
- (3) A traffic control device (except a traffic sign or a road marking) complies substantially with this regulation if the device complies substantially with a description of that kind of traffic control device in this regulation and, if the description includes a symbol for which there is a diagram in schedule 4, the symbol on the device is a reasonable likeness of the diagram.

Examples

- 1 A children's crossing may have a red and white post missing temporarily. The missing post does not prevent the crossing from meeting the description of such a crossing that is set out in s 80 (6).
- 2 A freeway may have several freeway signs missing. The missing signs do not prevent the area from still being considered to be a freeway.

- (4) A traffic sign may be a reasonable likeness of a diagram of a kind of traffic sign mentioned in this regulation even though 1 or more of the following apply to the sign:
- (a) the dimensions of the sign, or of anything on the sign, are different;
 - (b) the sign has additional information on or with it;
 - (c) the number on the sign is different;
 - (d) the sign has a different number of panels;
 - (e) the sign is combined on a single panel with 1 or more other traffic signs;
 - (f) for a parking control sign—words, figures, symbols, or anything else, on the sign are differently arranged;
 - (g) for a bus lane sign, emergency stopping lane only sign, one-way sign or parking control sign—the sign has an arrow pointing in a different direction;
 - (h) for a separated footpath sign or an end separated footpath sign—the pedestrian and bicycle symbols are reversed;
 - (i) for a road access sign—information on or with the sign indicates (whether by different wording or in another way) that it applies to different or additional vehicles or people;
 - (j) there is a variation in shade or brightness between a colour on the sign and the equivalent colour in the diagram.

Example—par (b)

A speed limit sign near a school may say that the sign has effect at certain times. This additional information does not prevent the sign being a reasonable likeness of the diagram of a speed limit sign in sch 2.

Example—par (c)

The diagram of the area speed limit sign in sch 2 has the number ‘60’. A particular area speed limit sign may have another number, for example, ‘50’. The different number on the sign does not prevent the sign being a reasonable likeness of the diagram.

Examples—par (d)

- 1 A school zone sign may have the indicated speed limit, the words ‘school zone’, and the times of operation, on a single panel or separate panels.
- 2 An end bicycle path sign may have the word ‘end’ on a separate panel or on the same panel as the rest of the sign.

Example—par (e)

A no parking sign that operates at certain times may be combined on a single panel with a permissive parking sign allowing pay parking at other times.

Example—par (f)

A permissive parking sign limiting parking to 2 hours may have the time limit above, or below, the word ‘parking’.

Example—par (i)

The diagram of the road access sign in sch 2 says ‘no pedestrians bicycles animals beyond this point’. The replacement of the word ‘bicycles’ by the word ‘tractors’ on a particular sign does not prevent the sign being a reasonable likeness of the diagram.

- (5) A variable illuminated message sign may also be a reasonable likeness of a diagram of a kind of traffic sign in schedule 2 or schedule 3 even though the colour of the sign, or of anything else on the sign, is different.

Example 1—Speed limit sign (standard sign)

Example 2—Speed limit sign (variable illuminated message sign)

- (6) A symbol on or in a traffic control device may be a reasonable likeness of a diagram of a kind of symbol mentioned in this regulation even though the dimensions of the symbol, or of anything on the symbol, are different.
- (7) In this section:
panel includes a board, plate and screen.

317 Information on or with traffic control device

- (1) A traffic control device may, by the use of words, figures, symbols or anything else, indicate any of the following:
- (a) the times, days or circumstances when it applies or does not apply;
 - (b) the lengths of road or areas where it applies or does not apply;
 - (c) the people to whom it applies or does not apply;
 - (d) the vehicles to which it applies or does not apply;
 - (e) other information.

Examples—circumstances

- 1 A speed limit sign may indicate that it applies when the lights at a children's crossing are flashing.
- 2 A speed limit sign may indicate that it applies when children are present.

- (2) In this section:

traffic control device includes a board, device, plate, screen, word, figure, symbol, or anything else, with a traffic control device that provides information about the application of the traffic control device.

Examples—information with a traffic control device

- 1 A plate erected immediately below a no U-turn sign may indicate that the sign applies on Monday to Friday between 8 am and 6 pm.
- 2 An illuminated board erected close to, but not next to, a no entry sign may indicate that commercial trucks are permitted to pass the sign when the words on the board are illuminated.

318 Limited effect of certain traffic control devices

- (1) If information on a traffic control device indicates that the device applies during particular times, on particular days, in particular circumstances, to a particular length of road or area, or to particular people or vehicles, the device has effect only for the indicated times, days, circumstances, length of road, area, people or vehicles.

Example

A shared zone sign on a road into an area may indicate that the sign applies on Monday to Friday between 7 am and 6 pm.

- (2) If information on a traffic control device indicates that the device does not apply during particular times, on particular days, in particular circumstances, to a particular length of road or area, or to particular people or vehicles, the device does not have effect for the indicated times, days, circumstances, length of road, area, people or vehicles.

Examples

- 1 A plate erected next to a pedestrian crossing sign at a place may indicate that the sign does not apply on a particular day.
- 2 A board erected close to a bus lane sign above a marked lane may indicate that the sign does not apply when the words on the board are illuminated.

- (3) If information on a traffic control device that is at a place indicates that it applies on a particular day of the week, the device does not have effect on a day that is a public holiday for the place unless information on the device states otherwise.

Example

If a loading zone sign indicates that it applies on Monday to Friday between 9 am and 4 pm and information on or with the sign does not indicate that it applies on public holidays, the sign does not have effect on any public holiday falling on a Monday to Friday.

- (4) In this section:

traffic control device includes a board, device, plate, screen, word, figure, symbol, or anything else, with a traffic control device that provides information about the application of the traffic control device.

319 Legal effect of traffic-related item

- (1) A traffic-related item of a kind mentioned in this regulation has effect for this regulation if—
- (a) the item is on a road, or on a vehicle on a road; and
 - (b) the item complies substantially with this regulation.
- (2) A traffic-related item is taken to comply with this regulation unless the contrary is proved.

320 When traffic-related item complies substantially with regulation

- (1) A traffic-related item complies substantially with this regulation if—
 - (a) it is a reasonable likeness of a diagram in schedule 4 (Symbols and traffic-related items) of that kind of traffic-related item; or
 - (b) for a traffic-related item of a kind for which there is not a diagram in schedule 4—it complies substantially with a description of that kind of traffic-related item in this regulation and, if the description includes a symbol for which there is a diagram in schedule 4, the symbol on the item is a reasonable likeness of the diagram.
- (2) A traffic-related item may be a reasonable likeness of a diagram of a kind of traffic-related item mentioned in this regulation even though 1 or both of the following apply to the item:
 - (a) the dimensions of the item, or of anything on the item, are different;
 - (b) the item has additional information.
- (3) A symbol on a traffic-related item may be a reasonable likeness of a diagram of a kind of symbol mentioned in this regulation even though the dimensions of the symbol, or of anything on the symbol, are different.

321 Meaning of information on or with traffic control device and traffic-related item

A word, figure, symbol or anything else used on or with a traffic control device or traffic-related item has the same meaning as in this regulation.

322 Reference to traffic control device and traffic-related item on road etc

- (1) A traffic control device or traffic-related item above or near a road is taken to be on the road.

Examples

- 1 A speed limit sign erected on a post at the side of a road is taken to be a speed limit sign on the road.
- 2 A traffic lane arrow on a structure immediately above the road is taken to be a traffic lane arrow on the road.
- 3 A do not overtake turning vehicle sign attached to a vehicle on a road is taken to be a do not overtake turning vehicle sign on the road.

- (2) However, the device or item is taken to be on the road only if it is clearly visible to road users to whom it is designed to apply.

Example

A shared zone sign erected on a post near the side of a road is a traffic sign on the road only if it is clearly visible to drivers driving on the road during the day and in normal weather conditions.

- (3) A traffic control device or traffic-related item above or near an area or place is taken to be in or at the area or place.

Examples

- 1 Traffic lights erected outside the area of an intersection, but near that area, are taken to be traffic lights at the intersection.
- 2 A hook turn only sign fixed to a structure above a road that is close to, but before, an intersection is taken to be a hook turn only sign at the intersection.
- 3 A parking control sign near the side of a road is taken to be at the side of the road.
- 4 A parking control sign near the centre of a road is taken to be at the centre of the road.

- (4) However, the device or item is taken to be in or at the area or place only if it is clearly visible to road users to whom it is designed to apply.

Example

A no right turn sign suspended from wires above a road close to, but before, an intersection is a traffic sign at the intersection only if it is clearly visible to drivers approaching the intersection during the day and in normal weather conditions.

- (5) Without limiting subsection (3), a traffic control device or traffic-related item above or near a break in a dividing strip is taken to be at the break.

Example

A no U-turn sign erected in a dividing strip close to, but before, a break in the dividing strip is taken to be at the break.

- (6) However, the device or item is taken to be at the break only if it is clearly visible to road users to whom it is designed to apply.
- (7) A traffic control device or traffic-related item is taken to comply with subsection (2), (4) or (6) unless the contrary is proved.
- (8) In this section:

clearly visible means—

- (a) for a traffic signal—clearly visible during the day and night in normal weather conditions; or
- (b) for another traffic control device or a traffic-related item—clearly visible during the day in normal weather conditions.

day means the period between sunrise on a day and sunset on the same day.

normal weather conditions means weather conditions that are not hazardous weather conditions causing reduced visibility.

323 Reference to light that is traffic signals

A reference in this regulation to a light that is, or is part of, traffic signals is a reference to a steady light, unless otherwise expressly stated.

323A Audible line

- (1) An audible line is a line on a road that is made up of a series of closely spaced raised pieces of material designed to create a continuous noise or vibration if driven on by a motor vehicle.
- (2) A reference in this regulation to a line is to be taken to include a reference to an audible line, unless otherwise expressly stated.
- (3) For this regulation—
 - (a) an audible line is to be taken to be continuous even if there is no physical link between the pieces of material that make up the line;
 - (b) if there is no physical link between those pieces, the colour of the audible line is to be taken to be the visible colour of those pieces.

Division 20.2 Application of traffic control devices to lengths of roads and areas

324 Purpose—div 20.2

325 Reference to traffic control device—application to length of road and area

In applying this regulation to a length of road or an area, unless the contrary intention appears, a reference to a traffic control device is a reference to a traffic control device applying to the length of road or area.

326 When traffic control device applies to length of road or area—basic rules

- (1) A traffic control device applies to a length of road or an area if—
 - (a) the device applies to the length of road or area under 1 or more provisions of this regulation; or
 - (b) the device, the position of the device, or information on or with the device, indicates that the device applies to the length of road or area.
- (2) A traffic control device does not apply to a length of road or an area if information on or with the device expressly indicates that it does not apply to the length of road or area.
- (3) Subsection (2) applies despite any other provision of this division.
- (4) In subsection (1) (b):
device includes another traffic control device.

327 Length of road to which traffic sign (except parking control sign) applies

The length of road to which a traffic sign on a road (except a parking control sign) applies is worked out in the direction driven by a driver, or travelled by a pedestrian, on the road who faces the sign before passing it.

Example

Section 21 (3) provides that a speed limit sign applies to the length of road beginning at the sign and ending at the nearest of a different speed limit sign, an end speed limit sign, or speed derestriction sign, and the end of the road. Only the nearest of those things, in the direction driven by a driver, or travelled by a pedestrian, who faces the sign before passing it, is relevant.

328 Reference to traffic control device applying to length of road

If, under this regulation, a traffic control device on a road applies to a length of road, the device applies only to a length of road on that road, unless otherwise expressly stated.

Example

A speed limit sign on a road does not apply to roads leading off from the road.

329 Traffic control device applying to marked lane

- (1) A traffic control device (except a road marking) applies to a marked lane if—
 - (a) it is above the marked lane; or
 - (b) it is near the marked lane, and the device, the position of the device, or information on or with the device, indicates that it applies to the marked lane.

Example

An emergency stopping lane only sign applies to the marked lane indicated by the arrow on the sign.

- (2) A road marking applies to a marked lane if it is on the surface of the lane.
- (3) However, a traffic control device does not apply to a marked lane if information on or with the device expressly indicates that the device does not apply to the marked lane.
- (4) In subsection (1) (b):
device includes another traffic control device.

330 Traffic control device applying to slip lane

- (1) A traffic control device (except a road marking) applies to a slip lane if—
 - (a) it is above the slip lane; or
 - (b) it is near the slip lane and on the left side of the slip lane; or
 - (c) it is near the slip lane, and the device, the position of the device, or information on or with the device, indicates that it applies to the slip lane.
- (2) A road marking applies to a slip lane if it is on the surface of the slip lane.
- (3) However, a traffic control device does not apply to a slip lane if information on or with the device expressly indicates that the device does not apply to the slip lane.
- (4) In subsection (1) (c):
device includes another traffic control device.

331 Traffic control device applying to intersection

A traffic control device applies to an intersection if it is at the intersection and does not apply to a slip lane at the intersection, unless information on or with the device expressly indicates that the device does not apply to the intersection.

332 Parking control sign applying to length of road

- (1) If a parking control sign displays an arrow and is at the side of a road, then, unless information on or with the sign indicates otherwise, the sign applies to the length of road between the sign and the nearest (in the direction indicated by the arrow) of the following:
 - (a) a parking control sign at that side of the road that displays an arrow indicating the opposite direction;
 - (b) a yellow edge line on the road;
 - (c) if the road ends at a T-intersection or dead end—the end of the road.
- (2) If a parking control sign displays an arrow and is at the centre of a road or on a dividing strip, then, unless information on or with the sign indicates otherwise, the sign applies to the length of road between the sign and the nearest (in the direction indicated by the arrow) of the following:
 - (a) a parking control sign at the centre of the road or on the dividing strip that displays an arrow indicating the opposite direction;
 - (b) a yellow edge line on the road;
 - (c) if the road ends at a T-intersection or dead end—the end of the road.

333 Parking control sign applying to length of road in area to which other parking control sign applies etc

- (1) If a parking control sign that applies to a length of road is in an area to which another parking control sign applies in accordance with section 335 (Traffic control device applying to area), the first parking control sign applies in the same way as it would apply if it were not in that area, and the second parking control sign does not apply to the length of road.

Example

Parking control signs that establish a loading zone or taxi zone may operate on a length of road in an area where parking is otherwise restricted to residents only by other parking control signs on each road into the area.

- (2) If the area indicated by a people with disabilities road marking is in an area to which a parking control sign applies in accordance with section 335, the road marking applies in the same way as it would apply if it were not in that area, and the parking control sign does not apply to the area indicated by the road marking.

334 How parking control sign applies to length of road

- (1) If a permissive parking sign, bicycle parking sign or motorbike parking sign, or a zone sign mentioned in division 12.5 (Stopping in zones for particular vehicles) applies to a length of road and there are parking bays on the length of road, the sign applies only to the parking bays, unless information on or with the sign indicates otherwise.
- (2) If a parking control sign applies to a length of road, the sign is at the side of the road, and there are no parking bays to which the sign applies, then, unless information on or with the sign indicates otherwise, the sign applies to—
 - (a) any shoulder of the road on that side of the road; and

- (b) the part of the road on the length of road that extends from the far side of the road (excluding any road related area) on that side of the road for—
- (i) if the sign, or information on or with the sign, includes the words ‘angle parking’ or ‘angle’—6m; or
 - (ii) in any other case—3m.

Example 1

Part of a road to which a parking control sign indicating angle parking applies

Example 2

Part of a road to which a parking control sign (except a sign indicating angle parking) applies

- (3) If a parking control sign applies to a length of road, the sign is at the centre of the road or on a dividing strip, and there are no parking bays to which the sign applies, then, unless information on or with the sign indicates otherwise, the sign applies to—
 - (a) if the sign is at the centre of the road, but not on a dividing strip—the part of the road on that length of road that extends 3m from the centre of the road on each side of the road; or
 - (b) if the sign is on a dividing strip—the dividing strip on that length of road and the part of the road on that length of road that extends 3m from each edge of the dividing strip.

335 Traffic control device applying to area

- (1) A traffic control device (except a road marking) applies to an area if—
 - (a) it is in the area; and
 - (b) the device, the position of the device, or information on or with the device, indicates that the device applies to the area.
- (2) A traffic control device (except a road marking) also applies to an area if—
 - (a) there is an identical kind of traffic control device (the *first traffic control device*) on each road into the area; and
 - (b) the traffic control device is a traffic control device applying to an area, or information on or with the device indicates that it applies to an area; and

- (c) information on or with a traffic control device on each road out of the area indicates that the first traffic control device no longer applies or that the area has ended.

Examples—traffic control devices applying to an area

- 1 a school zone sign (in some circumstances—see s 23)
- 2 a shared zone sign
- 3 a no stopping sign or no parking sign with the word ‘area’
- 4 a permissive parking sign with the words ‘parking area’
- 5 an end no parking area sign
- 6 an end no stopping area sign
- 7 an end parking area sign

- (3) A road marking applies to an area if—
- (a) it is on the surface of the area; and
 - (b) the road marking, the position of the road marking, or information in or with the road marking, indicates that the road marking applies to the area.
- (4) However, a traffic control device does not apply to an area if information on or with the device expressly indicates that the device does not apply to the area.
- (5) A parking control sign that applies to an area applies to parking bays on each length of road in the area, and to other parts of each length of road, as if it were a parking control sign that applied only to that length of road.
- (6) In this section:

device, in subsection (1) (b), includes another traffic control device.

road, in subsection (2) (a) and (c) and for an area of road, does not include a road related area.

road marking, in subsection (3) (b), includes another traffic control device.

336 How separated footpath sign and separated footpath road marking apply

- (1) A separated footpath sign, or separated footpath road marking, on a footpath applies in the way set out in this section.
- (2) The part of the footpath to the left of the centre of the footpath is designated—
 - (a) if a pedestrian symbol is on the left side of the sign or the path—for the use of pedestrians; or
 - (b) if a bicycle symbol is on the left side of the sign or the path—for the use of bicycles.
- (3) The part of the footpath to the right of the centre of the footpath is designated—
 - (a) if a pedestrian symbol is on the right side of the sign or the path—for the use of pedestrians; or
 - (b) if a bicycle symbol is on the right side of the sign or the path—for the use of bicycles.

Division 20.3 Application of traffic control devices to people

337 Purpose—div 20.3

This division explains when a traffic control device applies to a person.

338 Reference to traffic control device—application to people

In applying this regulation to a person, unless the contrary intention appears, a reference to a traffic control device is a reference to a traffic control device applying to the person.

339 When traffic control device applies to person—basic rules

- (1) A traffic control device applies to a person if—
 - (a) the device applies to the person under a provision of this division; or
 - (b) the device, the position of the device, or information on or with the device, indicates that the device applies to the person.
- (2) A traffic control device does not apply to a person if information on or with the device expressly indicates that it does not apply to the person.
- (3) Subsection (2) applies despite any other provision of this division.
- (4) In subsection (1) (b):
device includes another traffic control device.

340 Traffic control device (except road marking and parking control sign)

- (1) A traffic control device (except a road marking or parking control sign) applies to a person if—
 - (a) the device faces the person; or
 - (b) the person has passed the device and the device faced the person as the person approached it.

- (2) However, the device does not apply to the person if the position of the device indicates that it does not apply to the person.

Examples

- 1 If a driver is driving in a marked lane of a multi-lane road, a traffic lane arrow above another marked lane does not apply to the driver.
- 2 If a driver is turning left using a slip lane at an intersection, a traffic light on the right side of the painted island or traffic island that separates the slip lane from other parts of the road does not apply to the driver.
- 3 If a driver is driving on a two-way road, a speed limit sign facing only traffic travelling in the opposite direction does not apply to the driver.

341 Road marking

A road marking on the surface of a road applies to a person on the road unless the position of the road marking indicates that it does not apply to the person.

Examples

- 1 If a driver is driving on a road that is not a multi-lane road or one-way road, a road marking to the right of the centre of the road does not apply to the driver.
- 2 If a driver is driving in a marked lane of a multi-lane road, a road marking in another marked lane does not apply to the driver.
- 3 At an intersection, or on a roundabout, road markings indicating the edge of a marked lane for use by traffic coming from another direction do not apply to the driver.

342 Traffic sign (except parking control sign) applying to length of road

- (1) A traffic sign (except a parking control sign) that applies to a length of road and to drivers applies to a driver driving on the length of road if the driver is driving in the same direction as a driver on the road who faces the sign before passing it.
- (2) A traffic sign that applies to a length of road and to pedestrians applies to a pedestrian travelling on the length of road if the pedestrian is travelling in the same direction as a pedestrian on the road who faces the sign before passing it.

- (3) The traffic sign applies to the driver or pedestrian even though the driver or pedestrian does not pass the sign.

Example

If a driver turns from a side road or private land onto a length of road to which a traffic sign applies, the traffic sign applies to the driver even though the driver does not pass the sign.

343 Traffic sign (except parking control sign) applying to area

- (1) A traffic sign (except a parking control sign) that applies to an area and to drivers applies to a driver driving on any road in the area.
- (2) A traffic sign that applies to an area and to pedestrians applies to a pedestrian on any road in the area.
- (3) The traffic sign applies to the driver or pedestrian even though the driver or pedestrian does not pass the sign.

Example

The shared zone signs on the roads into a shared zone apply to a driver who starts a journey inside the shared zone.

344 Traffic control device applying to driver in marked lane

A traffic control device applying to a marked lane applies to a driver approaching, in or leaving the marked lane unless the position of the device indicates that it does not apply to the driver.

Example

An overhead lane control device above a marked lane that the driver does not face as the driver approaches it does not apply to the driver.

345 Traffic control device applying to driver in slip lane

A traffic control device applying to a slip lane applies to a driver approaching, in or leaving the slip lane.

346 Parking control sign

- (1) A parking control sign that applies to a length of road applies to a driver on the length of road.
- (2) A parking control sign that applies to an area applies to a driver in the area.
- (3) A parking control sign applies to a driver mentioned in subsection (1) or (2) even though the driver does not pass the sign.

Division 20.4 Prescribed traffic control devices

346A Preventing prescribed traffic control device being clearly visible

- (1) A person must not (except with the approval of the road transport authority) place anything in a position that prevents, or is likely to prevent, a prescribed traffic control device from being clearly visible to the road users to whom it is intended to apply.

Note **Prescribed traffic control device**—see the [Act](#), dictionary and the [Road Transport \(Safety and Traffic Management\) Regulation 2017](#), s 11.

Maximum penalty: 20 penalty units.

- (2) The road transport authority, a police officer or an authorised person may—
 - (a) orally or in writing, direct a person who has contravened subsection (1) by placing something to remove the thing within a stated reasonable time; or
 - (b) remove the thing.
- (3) If a person is given a direction under subsection (2) (a), the person must comply with the direction.

Maximum penalty: 20 penalty units.

Part 21 General

347 **Meaning of abbreviations and symbols**

Schedule 1 (Abbreviations and symbols) provides the meaning of certain abbreviations and symbols used in this regulation and on traffic control devices and traffic-related items.

348 **Reference to driver doing something etc**

If the context permits, a reference in this regulation to a driver doing or not doing something is a reference to the driver causing the driver's vehicle to do or not to do the thing.

Example

The reference in s 27 to a driver turning left at an intersection is a reference to the driver causing the driver's vehicle to turn left at the intersection.

349 **Reference to certain kind of road**

A reference in this regulation to a road of a particular kind is a reference to a road of that kind at any relevant place.

Example

Section 31 deals with a driver starting a right turn at an intersection from a road (except a multi-lane road). The section applies to a particular driver only if the road from which the driver is turning is not a multi-lane road at the intersection. In applying the section to the driver, it is irrelevant that the road is, or is not, a multi-lane road at another place away from the intersection.

350 **Reference to stopping or parking on length of road etc**

- (1) A driver stops or parks on a length of road, or in an area, if the driver stops or parks the driver's vehicle so any part of the vehicle is on the length of road or in the area.

- (2) A driver stops or parks within a particular distance from, before, or after, something if the driver stops or parks the driver's vehicle so any part of the vehicle is within that distance.

Example—s (2)

Section 190 provides that a driver must not stop on a road within 10m before or after a safety zone. The example diagram in s 190 shows a vehicle stopped so part of the vehicle is within 10m of the zone. For s 190, the vehicle is taken to be stopped within 10m of the zone.

- (3) A driver stops or parks on or across a driveway or other way of access for vehicles if the driver stops or parks the driver's vehicle so that any part of the vehicle is on or across the driveway or way of access.

351 Reference to left and right

- (1) In applying this regulation to a person, a reference to *left* is a reference to—
- (a) in relation to the person—the left-hand side of the person; or
 - (b) in relation to a line, sign or anything else—the left-hand side of the line, sign or other thing when viewed from the person's perspective.
- (2) In applying this regulation to a person, a reference to *right* is a reference to—
- (a) in relation to the person—the right-hand side of the person; or
 - (b) in relation to a line, sign or anything else—the right-hand side of the line, sign or other thing when viewed from the person's perspective.
- (3) A driver drives to the left, or right, of a line, sign or anything else only if the driver's vehicle is completely to the left, or right, of the line, sign or other thing.

352 Reference to stopping as near as practicable to place

A requirement in this regulation for a driver to stop as near as practicable to a place is not complied with only because the driver stops behind a vehicle that has stopped at the place.

Example

If a driver stops behind a vehicle that has stopped at a stop sign or stop line in accordance with s 67, s 68 or s 121, the driver must, after the vehicle has proceeded, stop at the stop sign or stop line in accordance with the section.

353 Reference to pedestrian crossing road

- (1) If a driver who is turning from a road at an intersection is required to give way to a pedestrian who is crossing the road that the driver is entering, the driver is only required to give way to the pedestrian if the pedestrian's line of travel in crossing the road is essentially perpendicular to the edges of the road the driver is entering—the driver is not required to give way to a pedestrian who is crossing the road the driver is leaving.
- (2) In this regulation, a reference to a pedestrian crossing a road includes a reference to a person who is crossing only part of a road (for example, a person walking to a safety zone or a median strip, or to the middle of a road to display a hand-held stop sign).
